

AI Skills Command Premium in 2025 Xcede Salary Report

LONDON, UNITED KINGDOM, March 5, 2025 /EINPresswire.com/ -- Despite overall technology sector salaries remaining stable through 2024, AI-related roles bucked the trend with significant salary increases, according to Xcede's newly released 2025 UK Salary Guide. The comprehensive report reveals that while most tech specialisations saw minimal movement, positions focused on AI saw notable wage growth as companies try to leverage the benefits of artificial intelligence.

"One notable trend from this year's report is the rising demand for AI talent, whether that be across Product, Research, or Engineering. Despite the stagnation in salaries across most skill sets in 2024, AI-related skills saw an increase in wages, particularly those focused on deployment and productisation," says Matthew Jones, UK Sales Director at Xcede.
