What Drives the [Extavia Market Growth](#)?

The increasing prevalence of multiple sclerosis (MS), a chronic autoimmune disease affecting the central nervous system, is a major driver of market growth. Extavia (interferon beta-1b) is widely used for relapsing-remitting multiple sclerosis (RRMS) due to its ability to reduce relapse frequency and slow disease progression. The growing number of MS patients is expected to fuel the demand for Extavia in the coming years.
