What Drives the [Evenity Market Growth](#)?

The growth of the Evenity market is primarily driven by the increasing prevalence of osteoporosis, a condition that weakens bones and raises the risk of fractures. This rise can be attributed to an aging population and sedentary lifestyles, both of which contribute to declining bone density.

Evenity is administered as a monthly injection over a 12-month course and is designed to enhance bone formation, reduce bone resorption, and strengthen bones to prevent fractures. According to a 2022 UK Parliament report, osteoporotic fractures impose a significant financial burden on healthcare systems, costing the NHS approximately \$5.8 billion (£4.6 billion) annually. By 2030, this cost is expected to escalate to around \$7.5 billion (£6 billion) due to the growing elderly population.
