

# Community Cloud Market Size is Projected to Reach USD 82.9 Billion by 2032 - Exclusive Research Report by AMR

*The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chains, regional landscapes, & competitive scenario*

WILMINGTON, DE, UNITED STATES, March 6, 2025 /EINPresswire.com/ --

Factors such as rise in demand for infrastructure with high performance and low latency, increase in need to reduce the number of servers and increase green computing, and rise in demand for security, compliance, and data redundancy, primarily drive the growth of the [community cloud market](#). However, governance and trust issues hamper the market growth to some extent. Moreover, rise in collaboration and information exchange between corporations is expected to provide lucrative opportunities for the market growth during the forecast period.

Allied Market

A community cloud, a kind of cloud infrastructure, meets the requirement of a particular community or group of organizations by allowing them to share resources and services based on common operational and regulatory requirements. Organizations can choose to host their own data centers and split the cost and responsibilities to set up a community cloud. The global generated \$4.7 billion in 2022, and is estimated to reach \$82.9 billion by 2032, witnessing a CAGR of 33.6% from 2023 to 2032.

The report analyzes these key players in the global community cloud market. These players have adopted various strategies such as expansion, new product launches, partnerships, and others to increase their market penetration and strengthen their position in the industry. The report is helpful in determining the business performance, operating segments, developments, and product portfolios of every market player.
