What Drives the Hyqvia Market Growth?

The increasing prevalence of autoimmune diseases remains a crucial driver of the Hyqvia market. These conditions arise from a combination of genetic susceptibility, environmental factors, dietary changes, and greater exposure to pollutants. Enhanced diagnostic techniques have also contributed to the rising detection of autoimmune disorders. Since these diseases cause the immune system to mistakenly attack healthy tissues, Hyqvia's immunoglobulin therapy helps regulate immune responses and mitigate abnormal activity.

For instance, an August 2022 study published by the National Library of Medicine documented 928 cases of autoimmune conditions associated with COVID-19 vaccinations, with 81.5% of them classified as new-onset disorders. This increasing prevalence further fuels the demand for Hyqvia.

Who Are the Key Players in the Hyqvia Market?

Leading companies driving the Hyqvia market include Takeda Pharmaceutical Company Limited. A dominant trend in the industry is the innovation of immunoglobulin-based treatment solutions. In January 2024, Takeda secured FDA approval for HYQVIA[®], a product designed for chronic inflammatory demyelinating polyneuropathy (CIDP) treatment in adults.

How Is the Hyqvia Market Segmented?

The Hyqvia market is categorized into:

1. By Patient Demographics: Pediatric Patients, Adult Patients
2. By Distribution Channel: Hospitals, Specialty Pharmacies, Home Healthcare Providers, Retail Pharmacies
3. By Application: Primary Immunodeficiency, Chronic Inflammatory Demyelinating Polyneuropathy, Other Applications
