

3D Concrete Printing Revolutionizes the Construction Industry at the 2025 Texas Innovation Tour

Featuring Robots Live 3D printing concrete walls and Live Fire-Resistance Test

PASADENA, TX, UNITED STATES, March 6, 2025 /EINPresswire.com/ -- The Texas Innovation Tour, a 3D Concrete Printing (3DCP) industry-leading event that will transform the future of construction, will be showcasing the advancements of 3DCP construction robotics from March 17 to March 28, 2025 in Pasadena, TX.

Hosted by Houston Gulf Coast Building and Trades Council and powered by Young Industries, in collaboration with Pasadena Fire Marshal's office, PVFD,

Gulf Coast Workforce Solutions, OPCMIA, RIC Robotics, Alquist 3D, Geopolymer International, and SKAPA, PLLC, with printing materials provided by QUIKRETE, this event will provide construction professionals with hands-on experience and training on how 3D printing is reshaping the construction industry. This tour will conclude with a live fire-resistance test of a 3D-printed concrete wall, finished by plasters and cement masons from the OPCMIA Local 783, demonstrating the technology's potential to enhance fire safety in modern construction.

The Texas Innovation Tour is an educational initiative designed to inform and provide hands-on experience for architects, engineers, contractors, and union members about how robotic 3D printing can solve industry challenges, including labor shortages, cost inefficiencies, demand for fire-resistant construction, and the incorporation of more sustainable materials. Last year's inaugural tour made a significant impact in Seattle, Washington, where over 300 industry partners, including Governor Jay Inslee, attended demonstrations at South Seattle College's Georgetown Campus to explore the latest developments in 3D printing.

What to Expect at the Texas Innovation Tour

March 17 to March 27: Attendees will have the opportunity to book a Q&A learning session during the tour, participate in industry specific workshops and walkthroughs, and witness a concrete structure being 3D printed using RIC Robotics' advanced robotic system. Industry partners with various roles will learn how they can incorporate robotic 3D printing to their existing work and be part of the innovation.

March 28: The event will culminate in an educational session with all partners from equipment, materials, workforce training, design, engineering and legislation. and presentation of structure built during workshops from 1-3 PM, followed by a barbecue burn bash from 3-7 PM, featuring the burn test of a concrete wall segment that was 3D-printed during this event, overseen by the Pasadena Fire Marshal's office and Pasadena Fire Department. This test will highlight the fire resistance of 3D-printed concrete structures, reinforcing the technology's viability in disaster-prone areas. Free food will be provided, together with fun and fire.

"3D printing is no longer an experimental concept—it's transforming the construction industry by making building faster, safer, and more cost-effective," said Ziyu Xu, founder of RIC Robotics. "We want to bring industry partners together to stay at the forefront of innovation because meaningful progress only happens when the entire industry advances together."

The Texas Innovation Tour marks another step forward in the inevitable industry evolution of integrating robotic 3D printing into mainstream construction. As more professionals seek efficient, resilient, and environmentally conscious building methods, events like this serve as a critical platform to accelerate adoption. Event Details

Location: 2210 Wichita St, Pasadena, TX 77502

Workshops & Tours: (March 17-27, 2025)

Workshop Session 1- History, Technology, Material Science lessons, Sandbox Design (9:00am-12:00pm)

The poster for the Texas Innovation Tour is a vertical rectangular graphic. At the top, a dark blue banner contains the dates "MARCH 17TH - MARCH 28TH" in white. Below this, the title "TEXAS INNOVATION TOUR" is prominently displayed in large, bold, blue and white letters. To the right of the title, it says "3DCP CONSTRUCTION ROBOTICS HOSTED BY:" followed by the "NABTU Houston Gulf Coast" logo, which includes a stylized orange outline of Texas. On the left side, a blue box labeled "POWERED BY:" features the "YOUNG INDUSTRIES" logo. In the center, a dark blue box titled "SESSION TIMES" lists the schedule for two weeks and a final day. To the right of this box is a QR code with the text "SCAN HERE FOR MORE INFO AND TO RSVP!". Below the session times, the address "2210 Wichita St Pasadena, TX 77502" is listed. At the bottom, a section titled "IN PARTNERSHIP WITH:" displays logos for RIC Technology, ALQUIST, GEOPOLYMER INTERNATIONAL, the City of Pasadena, SKAPA, and Workforce Solutions Gulf Coast. A "QUIKRETE" logo is also present on the right side, with the tagline "CEMENT & CONCRETE PRODUCTS". The background of the poster features a grayscale image of a city skyline.

POWERED BY:

YOUNG INDUSTRIES

SESSION TIMES

Week 1: Mon. March 17th - Fri. March 21st
9:00am - 12:00pm
1:00pm - 4:00pm

Week 2: Mon. March 24th - Thu. March 27th
9:00am - 12:00pm
1:00pm - 4:00pm

Fri. March 28th
Presentation: 1:00pm - 3:00pm
BBQ BURN BASH: 3:00pm - 7:00pm

2210 Wichita St Pasadena, TX 77502
