

MakoRabco Expands PEMB Solutions with Cutting-Edge Technology and Full-Service Engineering

MakoRabco, a leading name in self-storage construction, is expanding its expertise beyond self-storage by offering pre-engineered metal buildings solutions.

CARLSBAD, CA, UNITED STATES, March 11, 2025 /EINPresswire.com/ -- MakoRabco, a leading name in self-storage construction, is expanding its expertise beyond self-storage by offering pre-engineered metal building (PEMB) solutions for commercial, industrial, and specialized projects. Leveraging the latest design technology, MakoRabco delivers real-time building modeling that

“

Developers and contractors need more than just a structure—they need a comprehensive solution that integrates cutting-edge engineering with practical design.”

Angie Guerin - Executive Vice President of MakoRabco

enhances accuracy, boosts productivity, and identifies potential issues before construction begins—ensuring efficiency from concept to completion.

“Developers and contractors need more than just a structure—they need a comprehensive solution that integrates cutting-edge engineering with practical design,” said Angie Guerin, Executive Vice President at MakoRabco. “Our PEMB offerings include in-house engineering support, foundation design, and a tailored approach to meet each project’s unique requirements, allowing clients to focus on utilizing their buildings from day one.”

Designed for Versatility: PEMB Applications

MakoRabco’s PEMB solutions are ideal for a variety of projects, including:

Warehouses & Distribution Centers – Customizable layouts for optimized storage and logistics.

Manufacturing Facilities – Clear-span interiors for maximum production efficiency.

Retail & Commercial Buildings – Scalable designs to accommodate business growth.

Agricultural & Specialty Structures – Durable solutions for farming, aviation, and recreational facilities.

Unlike traditional construction methods, PEMBs provide long-lasting durability, flexibility, and affordability, making them a preferred choice for developers looking for low-maintenance, high-performance buildings.

A Complete Package: In-House Engineering, Installation, and Custom Solutions

MakoRabco sets itself apart by offering a full-service PEMB solution that goes beyond standard metal building packages.

In-House Engineering & Foundation Design – Our dedicated engineering team provides foundation designs along with stamped engineered plans tailored to meet the specific design loads of each project. These comprehensive plans ensure permit-ready submissions and seamless integration of the PEMB package from the ground up.

Packaged Labor Solutions – MakoRabco offers installation services backed by our Safety division or a can assist clients in coordinating labor solutions for their PEMB projects, streamlining the construction process for developers and general contractors while ensuring efficiency and quality throughout the build.

Insulation Packages – By providing insulation as part of the building package, MakoRabco ensures that the correct product is selected to meet building design standards and deliver the appropriate thermal performance for each project.

Door Packages – Our door packages include various door types, custom sizes, and multiple color selections to align with project requirements. By utilizing MakoRabco's in-house engineering team and experienced installers, we ensure doors are properly installed with a company-backed guarantee for long-term reliability and performance.

Custom Quotes for Project-Specific Needs – Taking into account factors like building size, location, and intended use, we tailor each PEMB package to meet the unique demands of every project.

“Our goal is to provide the complete package, so clients don't have to worry about piecing together separate components,” said Guerin. “From design and labor coordination to insulation and door systems, we offer a turnkey solution that ensures a seamless building experience from start to finish.”
