

New Inflatable Island Brings Resort-Style Relaxation to Everyday Water Enthusiasts

The ultimate floating island is here! A hassle-free, resort-style experience for lake lovers & boaters—launching this month on Indiegogo.

WEST TERRE HAUTE, IN, UNITED STATES, March 8, 2025

/EINPresswire.com/ -- A

groundbreaking new [inflatable boat](#) designed with electric propulsion for water lovers, cottage owners, and boat enthusiasts is launching on Indiegogo this month. This innovative [inflatable island](#) cruiser offers a spacious, stable, and high-quality alternative to traditional [inflatable dock](#), bringing a luxury-style relaxation experience to lakes, rivers, and coastlines.

The inflatable dock island is propelled by an electric outboard motor.

“

We wanted to create something that wasn't just another inflatable dock, but a true extension of the waterfront lifestyle, giving people more time to relax and enjoy the outdoors.”

Peter Appleton

Unlike standard inflatables that are difficult to transport, unstable, and short-lived, this new floating island is built for durability and effortless, all-day use. Designed for those who cherish life on the water, the platform provides a comfortable lounge space for families, friends, and adventurers looking to maximize their time on the lake.

“We wanted to create something that wasn't just another inflatable dock, but a true extension of the waterfront lifestyle,” said Peter Appleton, founder of the Inflatable Island co. “Whether you're a boat owner, a

waterfront homeowner, or someone who just loves spending time on the water, this floating island removes the hassle of setup and storage, giving people more time to relax and enjoy the outdoors.”

The launch comes at a time when interest in outdoor recreation, waterfront living, and sustainable leisure activities continues to rise. With more people seeking unique ways to enjoy

nature and unplug from technology, this product taps into a growing demand for portable, high-quality water experiences that go beyond traditional boating or shoreline activities.

The crowdfunding campaign on the Indiegogo platform will help bring the product to market, offering early backers an opportunity to be among the first to own this innovative floating island before its full commercial release.
