

allGeo, a Service by Abaqus Inc., Enhances Its End-to-End Field Workflow Automation Capabilities

allGeo enhances field service automation with scheduling, advanced time & jobs tracking, ERP & payroll integration, and compliance reporting.

PALO ALTO, CA, UNITED STATES, March 31, 2025 /EINPresswire.com/ -- Abaqus Inc., a leader in <u>field service</u> management technology, is proud to announce significant enhancements to its <u>allGeo</u> platform. Various upgrades have bolstered allGeo's end-to-end workflow automation, enabling businesses across industries such as healthcare, construction and facilities management to achieve greater efficiency, accuracy, and compliance in their field operations.

Transforming Field Service
Management with Advanced
Automation

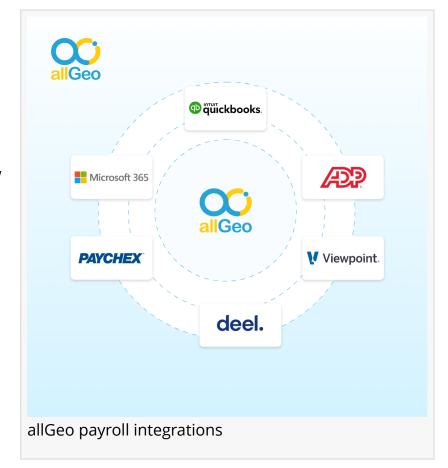

allGeo is engineered to streamline field operations through customizable, automated workflows that integrate seamlessly with payroll, job tracking, compliance, and reporting systems. With these latest enhancements, businesses can further optimize workforce management, minimize manual intervention, and enhance operational accuracy.

Key Features of allGeo For Workflow Automation

- 1. Job Scheduling & Dispatching
- a. Automated Assignment: Efficiently allocate tasks based on worker availability, location, and skill sets, ensuring optimal resource utilization.

- b. Real-Time Notifications: Keep field teams informed with instant updates on job assignments and changes.
- c. Integration with ERP systems: Importing employee data directly into allGeo from systems such as Sage and Trimble Viewpoint makes the workflow seamless.
- 2. Enhanced Geofencing & GPS Tracking with Mileage
- a. Automated Time Tracking: Utilize geofencing to automatically record employee check-ins and check-outs, ensuring accurate timekeeping.
- b. Real-Time Location Monitoring: Track field personnel in real-time to enhance accountability and operational oversight.

- c. Accurate Mileage Recording: Automatically track distances traveled by field staff to streamline expense reporting and reimbursement.
- 3. Advanced Field Data Collection
- a. Customizable Mobile Forms: Enable field employees to capture essential data, including inspections, signatures, QR scans, and photos, directly through their mobile devices.
- b. Offline Functionality: Ensure uninterrupted data collection in areas with limited connectivity.
- 5. Seamless Payroll Integration
- a. Comprehensive Pre-payroll Processing: Handle complex pay structures, including overtime calculations and shift differentials, to ensure precise compensation.
- b. Integration with Leading Payroll Systems: Direct synchronization with platforms such as ADP, QuickBooks, and UKG ensures accurate and timely payroll processing.
- 6. Regulatory Compliance & Enterprise-grade Security
- a. Industry-Specific Compliance: Support adherence to regulations such as HIPAA and OSHA, ensuring that field operations meet required standards.
- b. Labor compliance: Align with state and federal regulations by supporting data collection for

prevailing wages and certified payroll reports based on time, date, location, and duration of work.

- c. EVV compliance: For the healthcare industry, track employee attendance & client service records to report to State agencies for EVV compliance.
- d. Enterprise-Grade Security: Prioritize data protection with robust security measures and a reliable cloud-based infrastructure.
- 7. End-to-End Custom Workflow Automation
- a. Tailored Workflow Design: Customize workflows to align with specific business processes such as field inspections and lone worker safety.
- b. Third-Party Integrations: Facilitate seamless connectivity with existing business software systems to enhance end-to-end operational efficiencies.
- "allGeo has transformed how we manage EVV compliance. Tracking caregiver visits, capturing field data, and generating reports is now effortless. allGeo's automation of our workflow has reduced manual work, improved accuracy, and ensured seamless integration with California's EVV system. With allGeo, we can focus more on delivering quality care rather than administrative tasks."
- Shannon Hahn, Co-founder & Operations Director, Level Up Solutions

"At allGeo, our mission is to simplify and automate field service workflows, enabling businesses to focus on productivity and growth," said Shailendra Jain, CEO of Abaqus Inc. "With the latest enhancements to our platform, we are making field workforce automation more intuitive, powerful, and adaptable—helping organizations reduce errors, optimize labor costs, and achieve operational excellence."

About Abaqus Inc.

allGeo by Abaqus (<u>www.allgeo.com</u>) is an enterprise grade field service management platform for mid and enterprise businesses that spans all aspects of the field service workflow including Scheduling & Dispatch, Monitoring, Field Data Collection for time & jobs tracking, and Reporting & Analytics.

The allGeo platform with its built-in configurability is able to handle complex time tracking scenarios such as geofence time clock, crew/group check in, shift differential, overnight & overtime shifts, pay codes logging, lone worker safety and compliance requirements for OSHA. Companies using allGeo see a significant productivity boost and enhanced accuracy in payroll and job costing.
