

Quick Clean Routines: The Libman Company Offers Simple Tips for Staying Ahead of the Mess

The Libman Company is a family-owned company that has been making quality cleaning tools since 1896.

ARCOLA, ILL., IL, UNITED STATES, May 7, 2025 /EINPresswire.com/ -- Busy schedules and daily messes can make it tough to keep a home looking clean and tidy. But with a few time-saving strategies and the right tools, a quick clean routine can help maintain order without the overwhelm. The Libman Company, a 129-year-old U.S.-based manufacturer of household and commercial cleaning tools, offers expert tips to make day-to-day cleaning feel less like a chore—and more like a quick win.

1. Clean a Little Each Day

Instead of saving everything for one big cleaning day, break tasks into manageable chunks. Wipe down bathroom sinks in the morning, sweep high-traffic areas in the afternoon, and tackle one clutter hotspot before bed. Small, consistent efforts prevent dirt and grime from building up.

2. Keep Cleaning Tools Handy

Having go-to cleaning tools within easy reach can make a big difference. Store cloths, spray bottles, and brooms in high-use areas like the kitchen, mudroom, or bathroom. For floors, compact mop systems like the [Libman Lightning Spin Mop System](#) are easy to grab for quick spills and everyday touch-ups, especially on tile, hardwood, and laminate surfaces.

3. Tidy as You Go

The new Libman Lightning Spin Mop™ System

Make cleaning a natural part of one's daily flow. Wipe down counters after cooking, put items back where they belong immediately, and do a quick floor sweep after dinner. These habits only take a few minutes but help keep things under control.

4. Use Multi-Tasking Tools

Choose versatile cleaning tools that tackle a variety of messes. Reusable microfiber cloths, for instance, are effective on everything from kitchen counters to bathroom fixtures—and they can be washed and reused hundreds of times, reducing waste and saving money in the long run.

5. Prioritize High-Touch Areas

Light switches, doorknobs, remote controls, and faucet handles collect germs quickly. Make them part of a daily or weekly wipe-downs using a damp microfiber cloth and your preferred disinfectant.

6. Make It Easy to Move

Heavy buckets of water can slow down the cleaning process. A wheeled solution like the new [Libman Bucket Trolley](#) makes transporting cleaning supplies easier and more ergonomic—especially when moving room to room or cleaning large spaces.

With just a few smart habits and a handful of reliable tools, keeping a home clean doesn't have to take all day. The key is consistency—and a little help from high-performance tools that work hard.
