Furthermore, the growing demand for the adoption of cloud-based solutions and the increase in the growth of pirated content is boosting the [growth of the global anti-piracy protection market](#). In addition, the rapid growth of digitization and high internet penetration positively impact the growth of the anti-piracy protection market. However, the high cost of products, services, technological glitches and lack of technical proficiency, and lack of awareness are hampering the anti-piracy protection industry growth. On the contrary, rising government regulations related to data privacy and high spending on safeguarding the IT infrastructure is expected to offer remunerative opportunities for expansion during the anti-piracy protection market forecast.

Based on end user, the OTT platform segment accounted for the highest share in 2021, contributing to nearly one-fourth of the global anti-piracy protection market, and is expected to maintain its lead in terms of revenue during the forecast period. However, the gaming segment is expected to manifest the highest CAGR of 13.6% from 2022 to 2031.
