The current estimation of 2031 is projected to be higher than pre-COVID-19 estimates. The COVID-19 outbreak has high impact on the growth of procurement analytics market, as increasing number of smartphone users, growing adoption of connected devices, and surging e-commerce sector provide lucrative opportunities for the growth of the procurement analytics market. COVID has caused crises in social, economic, and energy areas and medical life worldwide throughout 2020. This crisis had many direct and indirect effects on all areas of society. In the meantime, the digital and artificial intelligence industry can be used as a professional assistant to manage and control the outbreak of the virus.

Based on the enterprise size, the large enterprises segment held the largest share of more than half of the global procurement analytics market in 2021, as it is very important for large-scale enterprises to keep procurement analytics data handy and securely to analyze customer demand. However, the SMEs segment is expected to maintain a prominent growth and exhibit the highest CAGR of 27.3% in 2031, due to the high adoption of procurement analytics by SMEs to effectively manage customer data, gain insights for developing marketing strategies, and become more productive, smarter, and efficient.
