What are the Main Factors Driving the Rebif Market?

The primary growth driver for the Rebif market is the increasing prevalence of multiple sclerosis (MS), a chronic autoimmune disease impacting the central nervous system.

- Several factors contribute to the rise in MS cases, including:
  - o Advances in diagnostic methods leading to earlier detection.
  - o Shifting demographic and lifestyle patterns.
  - o Genetic predispositions, particularly among women due to hormonal influences.

Rebif plays a crucial role in modulating the immune response and reducing inflammation, helping to protect nerve fibers from damage. This leads to better symptom management and lower disease activity, fueling its demand.
