What Is Driving Market Expansion?

A primary catalyst for market growth is the increasing prevalence of chronic diseases. Long-term conditions such as diabetes, cardiovascular disorders, and asthma are rising due to factors like an aging population, unhealthy lifestyles, and a growing incidence of risk factors including obesity, hypertension, and diabetes. Orthoclone OKT3, a monoclonal antibody targeting the CD3 receptor on T-cells, plays a crucial role in managing chronic diseases by regulating immune responses, reducing inflammation, and preventing immune-related complications in organ transplant rejection and autoimmune disorders.
