Prime determinants of growth

Stringent regulatory norms by governments to maintain quality of food & beverage products, expansion of foods & beverages manufacturing facilities, and surge in sales of packed foods & beverages drive the growth of the global industrial food and beverages filtration system market. However, technical issue in filtration process restrict the market growth. Moreover, new food & beverages filtration system product launches present new opportunities in the coming years.

The liquid filtration system segment to maintain its leadership status throughout the forecast period

Based on system type, the liquid filtration system segment held the highest market share in 2021, accounting for more than two-thirds of the global industrial food and beverages filtration system market, and is estimated to maintain its leadership status throughout the forecast period. Rise in waterborne diseases and increase in water pollutants such as chemicals, nitrates, and [heavy metals in water supply](#), owing to industrial pollution drives the market growth. However, the air filtration system segment is projected to manifest the highest CAGR of 6.6% from 2022 to 2031, owing to factors such as low cost, better emission levels & operating pressure.

The basket centrifuges segment to maintain its leadership status throughout the forecast period

Based on product types, the basket centrifuges segment held the highest market share in 2021, accounting for nearly one-fourth of the global industrial food and beverages filtration system market, and is estimated to maintain its leadership status throughout the forecast period. An increase in industrial effluent wastewater filtration in developing nations, such as Brazil, China, and India, combined with the implementation of regulatory requirements to monitor the quality of water in developed nations boosts the market growth. However, the baghouse filter segment is projected to manifest the highest CAGR of 7.7% from 2022 to 2031, attributed to its usage in many industrial applications to capture particulate matter.

The beverages segment to maintain its lead position during the forecast period

Based on application, the beverages segment accounted for the largest share in 2021, contributing to more than one-fourth of the global industrial food and beverages filtration system market. This is because filtration helps in maintaining consistent, premium water, flavors, and CO<sub>2</sub> in beverages. However, the dairy segment is projected to maintain its lead position in 2031 and is expected to portray the largest CAGR of 7.3% from 2022 to 2031, due to rise in food and dairy sector in developed and developing countries such as India, China, Germany and France.

North America to maintain its dominance by 2031

Based on region, North America held the highest market share in terms of revenue in 2021, accounting for nearly two-fifths of the global industrial food and beverages filtration system market. Foods & beverages safety regulations such as Food and Drug Administration (FDA) and Food Safety and Inspection Service (FSIS) are forcing companies to manufacture [foods & beverages filtrations systems in this region](#). However, the Asia-Pacific region is projected to maintain its lead position in 2031 and is expected to witness the fastest CAGR of 7.2% from 2022 to 2031. This is attributed to growth in the food & beverage industry in developing and developed countries such as India, China, Japan and Singapore.

Leading Market Players: -

3M Co.

Alfa Laval AB

Eaton Corp. Plc.

GEA Group AG

Graver Technologies LLC

Krones A  
Parker Hannifin Corp.  
Dorstener Wire Tech  
Critical Process Filtration Inc.  
Pall corporation  
Filter Concept Pvt. Ltd.  
Mott Corporation  
Aqseptence Group  
Universal Filtration  
Donaldson Company, Inc.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports Insights" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies, and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
