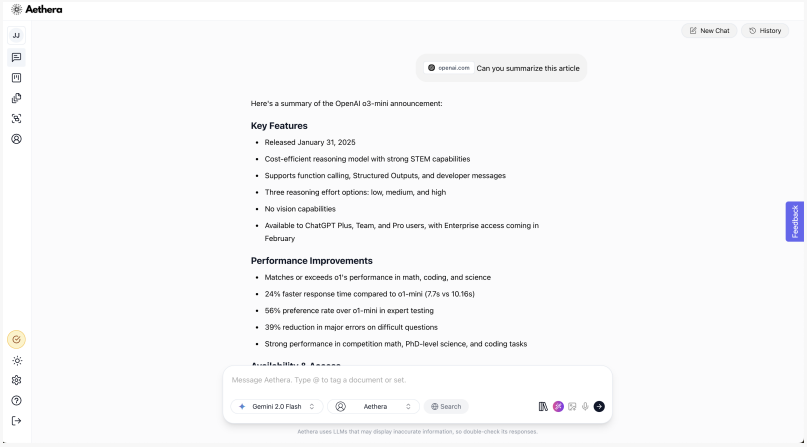
UAE's Aethera.ai Officially Launches Advanced AI-Native Editor and Precision Document Analysis Engine

Aethera.ai officially unveils its AI-native editor and precision document analysis engine, empowering seamless content creation and data retrieval accuracy.



Aethera.ai Updated Chat Interface

DUBAI, UNITED ARAB EMIRATES, March 13, 2025 /EINPresswire.com/ -- Numena L.L.C-FZ today announced a significant upgrade to its flagship SaaS platform, Aethera, introducing a revolutionary AI-powered editor and substantial enhancements to its document ingestion engine. These advancements position Aethera as an essential productivity tool for knowledge workers, educators, and businesses worldwide.

> Our new AI-native editor transforms document analysis and editing, delivering real-time assistance and unmatched accuracy to streamline workflows and elevate productivity.”
>
> *Maher Hassanieah, CEO @Numena L.L.C-FZ*

At the heart of this update is the new AI-enabled "Compose" editor, designed to transform the way users create and manage documents. The editor allows users to effortlessly generate documents from scratch, leveraging advanced AI to intelligently craft content. With an integrated AI chat sidebar, users gain real-time assistance directly within their workspace, seamlessly inserting AI-generated content into their documents. Contextual AI writing tools are accessible via a streamlined text-selection toolbar, enabling rapid content enhancement and refinement.

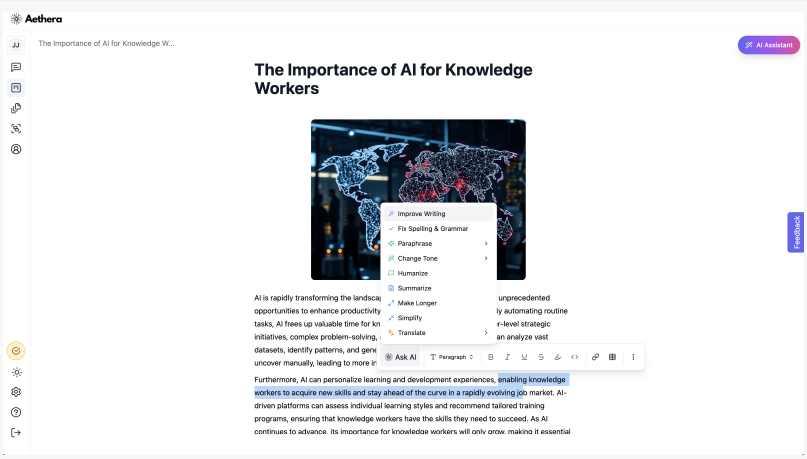
The slash command functionality in Aethera's editor provides users with quick and intuitive access to both AI-driven features and standard content blocks directly within their document editing workflow. By simply typing a forward slash (/), users trigger a menu that allows them to select from various block types—such as headings,

paragraphs, lists, blockquotes, tables, images, and videos—streamlining the document creation process.

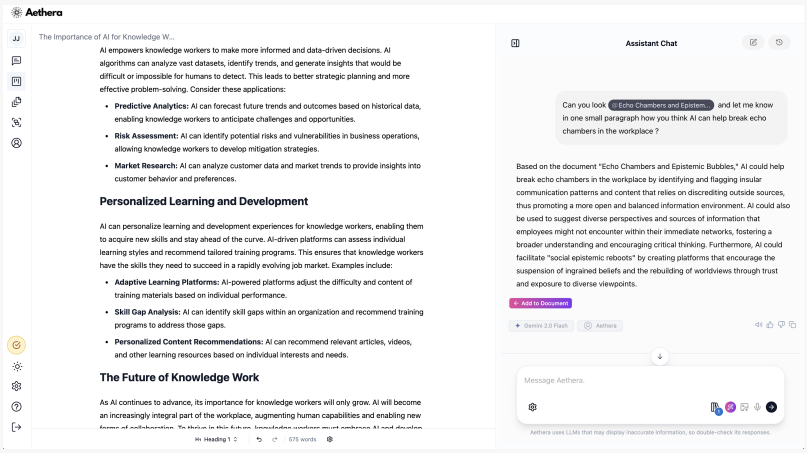
In addition to these standard blocks, the slash command menu prominently features advanced AI capabilities:

AI Write: Opens a prompt chatbox for Aethera's AI engine to generate text from a user prompt. Users specify personas/models, search the web, or tag documents for search. The generated text appears in a preview box where users can accept, regenerate, or dismiss it.

AI Image: Provides users with the ability to generate custom images directly within their documents. Users simply input a descriptive prompt, and Aethera's AI engine creates a relevant image that can be seamlessly embedded into the document.



Aethera.ai's New AI-Native Editor



Aethera.ai AI Editor with Assistant Open

Additionally, when users select any range of text within the editor, a floating editing toolbar appears, providing instant access to Aethera's AI-powered editing features through the "ASK AI" menu. This menu includes one-click functionalities such as writing improvements, grammar checks, translations, paraphrasing, and advanced text editing—all fully powered by Aethera's sophisticated AI technology. This ensures that users can effortlessly enhance and refine their writing without interrupting their workflow, significantly boosting productivity and content quality.

Alongside the editor, Aethera's ingestion engine has undergone substantial improvements, delivering a remarkable 30% increase in retrieval accuracy. The engine now offers significantly enhanced support for Arabic content, ensuring greater accuracy and reliability for users in the MENA region. Additionally, the upgraded Optical Character Recognition (OCR) processing achieves unprecedented speed, accurately extracting and analyzing tables and images from documents in record time. Document summarization capabilities have also been refined, effectively identifying key themes and topics, while overall ingestion speed has improved by 30% across all document types.

This release also includes a comprehensive user interface revamp, modernizing the Documents,

Sets, and Personas pages for a more intuitive user experience. Users can now effortlessly paste URLs directly into the chat interface, where they are instantly analyzed by Aethera's AI. Document tagging mechanisms have been streamlined, and chat loading times have significantly improved, enhancing overall responsiveness.

Further strengthening its AI capabilities, Aethera has expanded its model support to include cutting-edge AI models such as Deepseek R1, Gemini 2.0 Flash, Claude 3.7 Sonnet, Qwen QwQ 32B, GPT o3-mini, and GPT 4.5 (Preview), ensuring users always have access to the most advanced AI technology available.

With these groundbreaking updates, Aethera continues to redefine productivity and collaboration, empowering users to harness the full potential of AI-driven content creation and knowledge management.

Aethera enhances team productivity through intuitive collaboration, enabling seamless document sharing, collaborative querying, centralized knowledge management, and customizable access controls. These integrated features empower teams to fully leverage collective knowledge and AI-driven insights, creating a robust productivity ecosystem.

To accommodate diverse user needs, Aethera provides flexible pricing options. The Free Tier offers essential features, including document uploads and basic AI model access. The Plus Tier, at $15 monthly or $12.50 with annual billing, expands capabilities with increased quotas, YouTube video processing, web search integration, and advanced AI models. The Pro Tier, priced at $25 monthly or $20 annually, unlocks premium AI models, advanced webpage ingestion, voice-to-text functionality, and significantly higher usage limits, ideal for intensive professional use.
