Adoption of takaful insurance in non-Muslim countries and additional benefits of takaful insurance in comparison to conventional insurance drive the growth of the global takaful insurance market. However, limited consumer awareness and fewer market players hinder the market growth. On the other hand, advancements in technologies in the insurance sector and supportive government regulations provide new opportunities for the market in the next few years.

Takaful insurance provides various types of coverage such as family takaful, health takaful, motor, marine, business protection takaful and others. These coverage helps to minimize the risk and provides financial assistance at the time of emergency.

Covid-19 Scenario:

Owing to economic uncertainty occurred across the world, participants have been postponing donations of large sums of money. However, the collections would increase as participants recover from the financial losses incurred during the Covid-19 pandemic.

Rise in awareness regarding various takaful insurance types such as health, family, and others resulted in increased demand, which in turn, accelerated the growth of the market.

The key factors that boost the growth of the takaful insurance market trends are the acceptance of takaful insurance in non-Muslim countries and added benefits of takaful insurance as compared to conventional insurance. However, limitation of consumer awareness and lack of availability of market players restrict the takaful insurance market growth. Conversely, the development of advanced technology in the insurance sector and government friendly rules and regulations are expected to create huge opportunities for the market in the coming years.

The report offers a detailed segmentation of the global takaful insurance market based on distribution channel, type, application, and region.

Based on distribution channel, the agents & brokers segment contributed to the largest market share in 2020, holding nearly three-fifths of the total share, and is estimated to continue its lead position during the forecast period. However, the direct response segment is expected to witness the largest CAGR of 18.8% from 2021 to 2030.

Based on type, the general takaful segment accounted for the highest share in 2020, holding nearly three-fourths of the global takaful insurance market, and is estimated to maintain its leadership status during the forecast period. However, the family takaful segment is projected to manifest the highest CAGR of 16.3% from 2021 to 2030.
