

Ethylene Carbonate Market May See Big Move by 2027: Major Giants Empower Materials, BASF SE, Mitsubishi Chemical

The ethylene carbonate market is anticipated to generate \$418.5 million by 2027. Growth at a CAGR of 6.0% from 2020 to 2027

WILMINGTON, DE, UNITED STATES, March 12, 2025 /EINPresswire.com/ -- Allied Market Research has released a detailed report on the global [ethylene carbonate market](#). The research

provides an in-depth overview of revenue forecasting, the market's current and future objectives, new trends, and regional analysis, along

with a competitive scenario of the industry that presents leading companies and their past and present performance. In addition, extensive primary and secondary methodologies are utilized to evaluate accurate and impactful statistics about the overall market. As per the market analysis, the industry is estimated to generate revenue of \$418.5 million by 2027, having experienced a previous worth of \$288.0 million in 2019, showing a noteworthy CAGR of 6.0% from 2020 to 2027.

Request PDF Brochure: <https://www.alliedmarketresearch.com/request-sample/7672>

The report also outlines the primary determinants that influence market growth, encompassing drivers, constraints, and potential avenues for growth, along with their impact analysis. By examining these key factors, businesses and stakeholders are able to formulate informed strategies that align with industry insights and consumer demands. This data permits them to identify gaps in the market, predict obstacles, and make data-driven decisions, thus boosting competitiveness and promoting long-term expansion.

The global ethylene carbonate market is experiencing growth, owing to the surge in demand for lithium-ion electrolytes and lubricants, along with the rise of the automotive sector in Asia-Pacific. However, the volatility in the price of raw materials impedes the expansion of the market.

Nevertheless, rapid urbanization and increase in adoption of cutting-edge technologies in lithium-ion batteries are expected to create new opportunities in the coming years.

Recent Technological Innovations in the Ethylene Carbonate Sector

Recent technological progress has considerably influenced the production and applications of ethylene carbonate. Below are notable innovations:

Green synthesis of ethylene carbonate through CO₂ utilization

The green synthesis of ethylene carbonate focuses on the direct capture and utilization of CO₂, making the process more sustainable. Innovations include advanced catalysts such as metal-organic frameworks (MOFs) and electrochemical systems powered by renewable energy to enhance reaction efficiency and lower costs. This approach reduces the carbon footprint by converting industrial CO₂ emissions into valuable products, aligning with decarbonization goals. In addition, pilot-scale plants are showcasing the scalability of this method, highlighting its potential for industrial adoption. This innovation supports environmental sustainability while making ethylene carbonate manufacturing affordable and eco-friendly.

Enhanced ethylene carbonate for lithium-ion batteries

Lithium-ion batteries, particularly those utilizing innovative ethylene carbonate formulations, have improved performance and longevity. Modified derivatives, such as fluoroethylene carbonate (FEC), enhance battery efficiency by promoting the development of a stable solid electrolyte interphase (SEI) layer. Nano-coating techniques also improve the interaction effects between electrodes. These advancements contribute to longer battery life, reduced internal resistance, and higher energy density, making lithium-ion batteries more reliable for applications in electric vehicles and energy storage systems. Innovations in battery technology guarantee that ethylene carbonate remains essential as the demand for advanced batteries continues to rise, thereby supporting global efforts to achieve more energy efficiency and meet goals associated with electric vehicles and renewable energy.

Top Players in the Ethylene Carbonate Market

The AMR report examines the performance of several top companies in the market using primary research methodologies. This study provides the profile of these multinational giants to assist new entrants in the industry make informed investment choices. The prominent players included in the report are:

Huntsman Corporation

MERCK KGaA

Empower Materials, Inc.

Mitsubishi Chemical Holdings

Thermo Fisher Scientific Inc.

Asahi Kasei Corp.

BASF SE

Vizag Chemicals International

Prasol Chemicals Ltd.

Cole-Parmer Instrument Company, LLC

In a nutshell, the AMR report on the ethylene carbonate industry offers a comprehensive analysis of the important factors that affect this market. The precise actionable insights and the valuable data given in the study permit the companies to align their strategies with dynamic market developments.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
