*Air Handling Units Market to Observe Strong Development by 2031 To Reach \$24.9 Bn | Industry Trends, Growth & Forecast*

NEW CASTLE, DE, UNITED STATES, March 12, 2025 /EINPresswire.com/ -- The [air handling units market](#) size was valued at \$12.6 billion in 2021, and is estimated to reach \$24.9 billion by 2031, growing at a CAGR of 6.8% from 2022 to 2031. An air handling unit, also known as an air handler, is a device used to condition and circulate air as a component of heating, ventilation, and air conditioning systems. This handler is typically a large metal box containing blowers, heating and cooling elements, filter chambers, silencers and dampers. Air handling units are connected to ducts to distribute conditioned (and heated or cooled) air throughout the building before returning to the AHU.

Increase in health issues associated with deteriorating indoor air quality and rise in environmental concerns are some of the factors contributing significantly to the increased demand for air handling units in buildings. Furthermore, rise in infrastructure development and green building initiatives by various developing and industrialized nations around the world are anticipated to boost the air handling units market opportunity.

In addition, requirement of air handling units in airports, hotels, multiplexes, office buildings, schools, hotel restaurants and commercial complexes is expected to surge the air handling units market growth. In addition, increase in tall buildings and skyscrapers and increase in construction of commercial and residential buildings fuel the growth of the air handling units market.

In addition, infrastructural dominance for hotels, restaurants and other commercial establishments has become a matter of reputation and prestige. This factor coupled with need for better air conditioning facilities has created new opportunities for market growth.
