Citrus Concentrate Market Size was at \$7.8 billion in 2021, and is estimated to reach \$12.9 billion by 2031, growing at a CAGR of 5.3% from 2022 to 2031.

WILMINGTON, DE, UNITED STATES, March 12, 2025 /EINPresswire.com/ -- Many key players in the global market are coming up with various new formulations and products in the [citrus concentrate market](#) to cater to the increasing demand for products among consumers. The major factor that drives the growth of the citrus concentrate market is owing to increasing demand from beverage manufacturers. This is attributable to an increase in the consumption of refreshing juice, which can be made by mixing the citrus concentrate with water. Growing consumer demand for effective flavors and tastes has led to huge investments by key players to develop citrus food and beverage products and cater to the increase in consumer demand. Also, consumer inclination toward natural and organic flavors has led to a surge in R&D efforts in the citrus concentrate industry. At present, many leading market players are focusing on R&D to develop new types of concentrates for new flavors.

The citrus concentrate market is meant to provide a safe flavor choice in the production of juices, soft drinks, ice creams, syrups, bakery products, candy products, and others. Citrus concentrate is processed, which means its water content is evaporated after extracting the real fruit juice like from orange and lemon and then dried up to make a powder. This powder form of juice is known as concentrate. Citrus concentrate also refers to the natural source of vitamins and minerals that are consumed by people to obtain vitamin A, B1, C, and A, potassium, and sulphur, which helps in strengthening the immune system and prevents mucosal infections. The citrus concentrates are a mixture of orange concentrate, grapefruit concentrate or lemon concentrate, that is being consumed directly or along with water based on requirement.
