What Is Driving the Growth of the [Ragwitek Global Market](#)?

- The rising prevalence of allergic rhinitis (hay fever) is a primary factor fueling the Ragwitek market's growth.
- Allergic rhinitis is caused by overactive immune responses to allergens such as:
  - o Pollen
  - o Dust mites
  - o Mold spores
  - o Pet dander
- Several external factors are exacerbating allergic conditions, including:
  - o Climate change, which extends pollen seasons and worsens allergen exposure.
  - o Urbanization, contributing to increased air pollution and allergy severity.
  - o The hygiene hypothesis, suggesting that cleaner environments may lead to a rise in allergic diseases.
- Ragwitek, a sublingual immunotherapy treatment, is widely used to reduce allergic rhinitis symptoms by building patient immunity to ragweed pollen.
- According to Allergy UK (April 2024):
  - o Over 21 million people in the UK suffer from allergies.
  - o Allergies were the most commonly reported chronic health condition in 2022.
  - o By 2026, half of Europe's population is expected to have at least one allergy.
