What Factors Are Driving the Growth of the Skytrofa Market?

The demand for hormone replacement therapy (HRT) plays a significant role in boosting the Skytrofa market. HRT is used to supplement essential hormones, such as estrogen and progesterone, to address menopause symptoms and hormonal imbalances.

The increasing aging population has heightened the need for HRT. Skytrofa is widely utilized in HRT through subcutaneous injections, aiding in growth hormone deficiency treatment.

Supporting data:

• The UK's National Health Service (NHS) reported that in 2022-23, 11 million HRT prescriptions were issued, marking a 47% increase from the previous year.

• Around 2.3 million patients received HRT prescriptions, reflecting a 29% rise from the prior year.
