

Hyatt Regency Phuket Resort Achieves Reef Rehabilitation Certification, Leading Marine Conservation Efforts

THAILAND, March 13, 2025

[/EINPresswire.com/](https://EINPresswire.com/) -- Hyatt Regency Phuket Resort is proud to announce that its Marine Biological Center (MBC) team has successfully completed the Reef Rehabilitation Diving Course on March 4-5, 2025, making it the only resort in Phuket to achieve this prestigious certification. This accomplishment is a major step forward in the resort's mission to lead coral restoration projects and enhance marine conservation efforts in the region.

The MBC team, led by Marine Biologists and Educators Marat Khaidarov and Chutharat Satecho, under the supervision of Milos Zivkovic, Resort Experiences Manager, recently participated in an in-depth training session conducted by specialists from the Department of Marine and Coastal Resources (DMCR), Chatchai Pucksachad and Itsaret Pongthong.

The training covered both theoretical knowledge and practical application of coral restoration techniques, emphasizing the use of epoxy glue and brick base methods for safe and effective underwater coral planting.

This initiative strengthens our commitment to marine conservation and sustainable ecosystem

restoration.

With this certification, Hyatt Regency Phuket Resort plans to:

- Enhancing the natural beauty of our House Reef by carefully restoring coral structures
- Establish the Marine Biological Center as a leading destination for marine education and conservation, offering guests and the local community opportunities to learn about marine life and participate in conservation activities.

"Our goal is to build a sustainable marine ecosystem and inspire both our guests and the local community through hands-on education and conservation efforts," said Marat Khaidarov. "By restoring House Reef, we contribute to rebuilding ecosystems, protecting coastline, and preserving the ocean for future generations."

This achievement highlights the resort's commitment to a sustainable future for the Phuket coastline, offering unique experiences for divers, snorkelers, and marine enthusiasts, and enhancing the guest experience through impactful conservation initiatives.
