*The sugar alcohol market is anticipated to grow at a CAGR of 5.05% from US\$10.613 billion in 2025 to US\$13.578 billion by 2030.*

NEW YORK, NY, UNITED STATES, March 13, 2025 /EINPresswire.com/ --

According to a new study published by Knowledge Sourcing Intelligence, the [sugar alcohol market](#) is projected to grow at a CAGR of 5.05% between 2025 and 2030 to reach US\$13.578 billion by 2030.

The global sugar alcohol market is experiencing significant growth as consumers continue to seek out healthier and low-calorie alternatives to traditional [sweeteners](#).

One of the key drivers of this growth is the increasing awareness of the negative health effects of consuming excessive amounts of sugar. As more people become health-conscious, they are actively seeking out alternatives to traditional sugar that can still satisfy their sweet cravings without the added calories. This has led to a surge in demand for sugar alcohols, which are low-calorie sweeteners derived from natural sources such as fruits and vegetables.

The market is also being fueled by the rising prevalence of diabetes and obesity, particularly in developed countries.

With sugar alcohols having a lower glycemic index and fewer calories than sugar, they are becoming a popular choice for people looking to manage their blood sugar levels and maintain a healthy weight. This has led to an increase in the use of sugar alcohols in various [food and beverage](#) products, including baked goods, confectionery, and beverages.

Despite the growth potential, the sugar alcohol market still faces challenges such as limited consumer awareness and concerns about potential side effects. However, with ongoing research and development efforts to improve the taste and functionality of sugar alcohols, as well as increasing investments by key players in the market, these challenges are expected to be overcome in the coming years.

As the demand for healthier and low-calorie alternatives continues to rise, the sugar alcohol market is poised for further growth and innovation. With a wide range of applications and potential health benefits, sugar alcohols are becoming a staple ingredient in many food and beverage products. This presents a significant opportunity for companies in the market to capitalize on this trend and meet the evolving needs of consumers.
