Increase in incidences of chronic diseases and lifestyle associated disease and surge in geriatric population across the globe drive the growth of the global clinical nutrition market. On the other hand, lack of awareness for clinical nutrition and stringent regulations and poor reimbursement policies impede the growth to some extent. However, various growth opportunities in emerging economies are expected to be beneficial for the market growth.

Clinical nutrition refers to the nutrition of patients in the healthcare industry or clinical refers to the management of outpatients as well as inpatients in clinics and hospitals. It aims to maintain a healthy energy balance in patients, as well as providing require amounts of other nutrients such as protein, vitamins, minerals, etc. The advantages of clinical nutrition are, it is very effective in treating type 1 or type 2 diabetes and helps one to live better at any age. Clinical nutrition products are outwardly provided to patients who are unable to digest certain nutrients products. These products help in improving metabolisms, digestion, absorption, transportation, storage, and discharge of the human body.
