

Saniflow Corp. Addresses Critical Hygiene Needs in Public Spaces with Babymedi® Baby Changing Stations

Saniflow Corp., a leader in commercial hygiene solutions, is addressing this hygiene crisis with its innovative Babymedi® changing stations.

MIAMI, FL, UNITED STATES, March 20, 2025 /EINPresswire.com/ -- In today's world, maintaining optimal hygiene in public spaces is more crucial than ever. [Saniflow Corp.](#), a leader in commercial hygiene solutions, is addressing this critical need with its innovative [Babymedi®](#) baby changing stations, designed to provide a safe and hygienic environment for infants and caregivers.

Public spaces, such as shopping centers, airports, and entertainment venues, are frequently visited by diverse populations, making them potential hotspots for the spread of germs and bacteria. For parents with young children, finding a clean and safe place to change diapers can be a significant challenge. Saniflow Corp.'s Babymedi® changing stations are engineered to alleviate these concerns, prioritizing the health and well-being of infants and caregivers.

"The importance of hygiene in public spaces cannot be overstated, especially

Babymedi Horizontal Changing Station

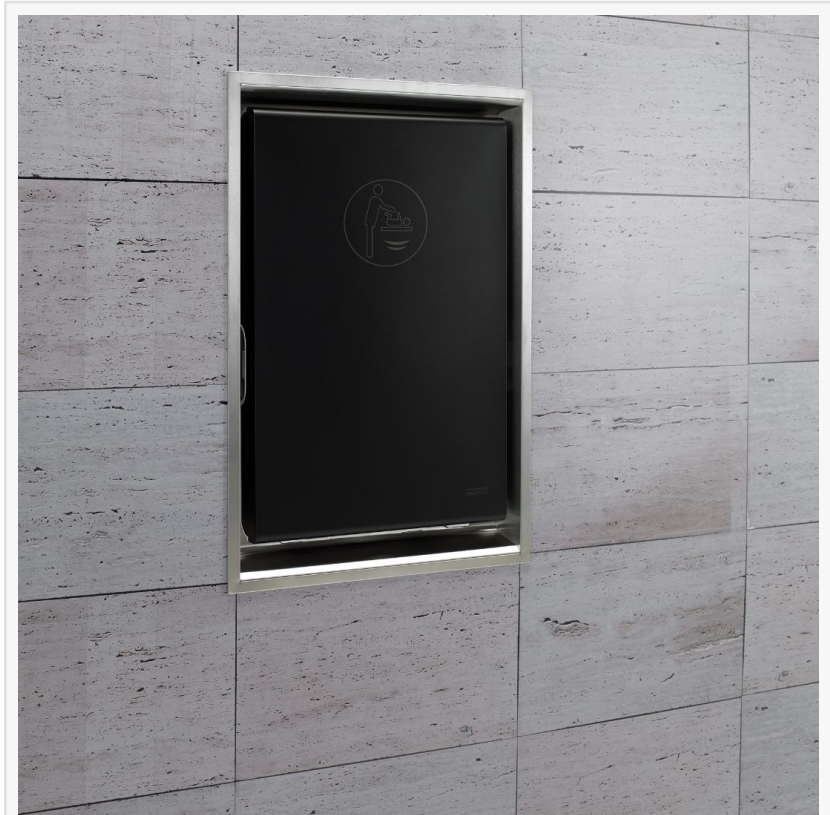

Babymedi Stainless Steel Horizontal

when it comes to the safety of our children," said Juliana Acosta, the Sales Coordinator at Saniflow Corp. "Our Babymedi® changing stations are designed to provide a reliable and hygienic solution, giving parents peace of mind while they are on the go."

The Babymedi® changing stations incorporate several key features that contribute to a cleaner and safer environment, starting with Ion Hygienic Technology, which is an ionizer integrated into the polypropylene surface that neutralizes viruses and bacteria through the emission of negatively charged particles. Additionally, a BioCote® Antimicrobial Additive is instilled in every unit, which provides an antimicrobial additive that inhibits the growth of bacteria and other microorganisms. Lastly, durability and easy cleaning are apparent, even in high-traffic areas, as these changing stations are constructed from high-quality material like Stainless steel and polypropylene. The Ion Hygienic technology has also been independently tested and approved by [TÜV Rheinland](#), providing assurance of its effectiveness.

Saniflow Corp. understands the challenges faced by families in public spaces and is committed to providing solutions that promote health and hygiene. With this in mind, the company has provided multiple colors/finishes in vertical, horizontal, surface-mount, or recessed for ADA compliance in order to make it as easy as simple as possible for installation in any restroom. By installing Babymedi® changing stations, public facilities can demonstrate their commitment to the well-being of their patrons and create
