

Processed Food Market estimated to reach US\$2,683.164 billion by 2030 at a CAGR of 4.45%

The processed food market is anticipated to grow at a CAGR of 4.45% from US\$2,157.761 billion in 2025 to US\$2,683.164 billion by 2030.

NEW YORK, NY, UNITED STATES, March 19, 2025 /EINPresswire.com/ -- According to a new study published by Knowledge Sourcing Intelligence, the [processed food market](#) is projected to grow at a CAGR of 4.45% between 2025 and 2030 to reach US\$2,683.164 billion by 2030.

The processed food market has been a staple in the food industry for decades, providing convenient and affordable options for consumers. However, with the rise of health-conscious consumers and the demand for natural and organic products, the market has faced challenges in recent years. Despite this, the processed food market continues to thrive and adapt to changing consumer preferences.

This growth can be attributed to the increasing demand for convenience and ready-to-eat meals, especially in urban areas where busy lifestyles are prevalent. Additionally, the rise in disposable income and the growing trend of dual-income households have also contributed to the market's growth.

One of the key factors driving the processed food market is the continuous innovation and development of new products. Manufacturers are constantly introducing new

and improved products to cater to the changing tastes and preferences of consumers. This includes the incorporation of healthier [ingredients](#), such as whole grains and [plant-based](#)

proteins, as well as the reduction of artificial additives and preservatives. This has not only attracted health-conscious consumers but has also helped to dispel the negative perception of processed foods.

Despite the challenges faced by the processed food market, it remains a significant player in the food industry. With the increasing demand for convenience and the continuous innovation of new products, the market is expected to continue its growth trajectory. As consumers become more conscious of their health and the environment, the processed food market is also adapting to meet these demands. This presents an opportunity for manufacturers to tap into this growing market and provide consumers with a variety of convenient and healthier options.
