

# Conversational AI Market Expected to Reach USD 32.62 Billion By 2030

*The Conversational AI Market is segmented on the basis of component, deployment, type, technology, and end user.*

WILMINGTON, DE, UNITED STATES, March 19, 2025 /EINPresswire.com/ --

The global [conversational AI market](#)

share is expected to witness

considerable growth, owing to an

increase in demand for AI-powered

chatbot solutions, especially in Asia-

Pacific and LAMEA, due to the rise in

demand for digital infrastructure

solutions across healthcare, retail & E-commerce, and hospitality sectors in these regions. Allied

Market Research, titled, "Conversational AI Market By Component, Deployment, Type,

Technology, and End User: Global Opportunity Analysis and Industry Forecast, 2021–2030", The

conversational AI market size was valued at \$5.78 billion in 2020, and is projected to reach at

\$32.62 billion by 2030, growing at a CAGR of 20.0% from 2021 to 2030.

“

The surge in demand for AI-based chatbot solutions, and an increase in demand for AI-powered customer support services, etc. boost the Conversational AI market growth.”

Conversational AI is a combination of natural language processing with machine learning solutions, such as virtual agents or conversational bots, which are specifically

designed to interact with the user through talking. Further, conversational AI technology is designed to use machine learning, a large volume of data, and natural language processing to help virtual agents imitate human interactions, text inputs, and human interaction to interpret their meanings in numerous languages.

Conversational AI Market Size

Furthermore, conversational artificial intelligence has components designed to allow Gartner chatbot or virtual agents to understand, process, and generate a response. Moreover, advancement in artificial technology is one of the prime factors adding value to conversational AI technology, which is expected to drive the [conversational AI market growth](#) during the forecast period.

The growth of the global conversational AI market is majorly driven by a rise in demand for AI-based chatbot solutions paired with the surge in demand for AI-powered customer support services. However, a lack of knowledge about conversational AI-based solutions acts as a prime restraint of the global market. On the contrary, the rise in deployment of omnichannel methods globally coupled with growth in customer commitment through social media platforms is anticipated to provide lucrative opportunities for the conversational AI industry during the forecast period.

According to conversational AI market research, the chatbot segment was the highest contributor to the market in 2020. The retail & e-commerce and healthcare segments collectively accounted for around 49.3% market share in 2020. The surge in the adoption of chatbot technology applications across healthcare and automotive sectors has led to the growth of the chatbot segment; thereby, enhancing the market growth.

The outbreak of COVID-19 has significantly impacted the growth of the market. The rise in demand for an artificial intelligence-powered digital assistant solution across prime enterprises has significantly propelled the demand for conversational AI-based digital applications during the pandemic. However, the lack of availability of a professional workforce due to partial and complete lockdowns implemented by governments across the globe restrained the growth of the market during the pandemic. Moreover, the healthcare and hospitality sector globally started to deploy conversational AI-powered solutions, and thus is expected to drive the growth of the [conversational AI market analysis](#) post-pandemic.

Region-wise, North America holds a significant share of the global conversational AI market. The adoption of interactive voice response system solutions in the retail & E-commerce sector is expected to propel the growth of the conversational AI industry in this region. Moreover, the surge in demand for chatbot technologies across hospitality and healthcare sectors in North America is anticipated to drive the conversational AI market trends in this region.
