

Talkaphone & Sunflower Labs Announce Partnership to Enhance Security with Emergency Phone + Autonomous Drone Integration

Proven & progressive meet to deliver a real-time monitoring and rapid response solution made for today.

NILES, IL, UNITED STATES, March 24, 2025 /EINPresswire.com/ --

[Talkaphone](#), a leader in security solutions, including blue light phone technology, and Sunflower Labs, the maker of autonomous security drone solutions, are excited to announce a pioneering partnership that brings together trusted emergency communication with cutting-edge AI and drone surveillance.

This collaboration enables Talkaphone's blue light emergency phones to integrate seamlessly with Sunflower Labs' AI-powered drone technology. When the call button is pressed on the [Talkaphone blue light phone](#), the "Bee" drone can be deployed to surveil the area while help is on the way or provide a safety escort to enhance personal safety. A single Bee drone can support a network of emergency phones, covering up to a 600-meter radius from the "Hive" rapid recharging and docking station - over 250 acres. This integration creates a proactive security solution that delivers real-time situational awareness and rapid response capabilities.

By integrating Talkaphone's trusted blue light emergency phones with Sunflower Labs' AI-powered security drones, this collaboration delivers real-time situational awareness and rapid response capabilities.

Attendees at ISC West, April 2-4, 2025, in Booth 16109, will have the exclusive opportunity to see the Emergency Phone + Autonomous Drone Integration in person.

"At Talkaphone, we are always looking for new ways to enhance public safety. Our partnership

This collaboration ensures that individuals in distress not only have a direct line to help but also real-time aerial security when they need it most."

*Steve Johnson, CEO of
Talkaphone*

with Sunflower Labs takes emergency response to the next level by integrating advanced AI-driven drone surveillance with our trusted blue light phone technology," said Steve Johnson, CEO of Talkaphone. "This collaboration ensures that individuals in distress not only have a direct line to help but also real-time aerial security when they need it most."

Alex Pachikov, CEO of Sunflower Labs, added, "Our autonomous security drones are designed to provide rapid, intelligent, and real-time surveillance. By integrating

with Talkaphone's blue light emergency phones, we are creating an unparalleled security solution that bridges the gap between emergency communication and proactive surveillance."

The [Talkaphone and Sunflower Labs partnership](#) represents a significant step forward in security innovation, providing communities, campuses, and public spaces with an intelligent, responsive, and highly visible safety solution.
