

SW Sustainability Solutions Inc. Achieves SME B Climate Score in 2024 CDP Disclosure

UNION CITY, CA, UNITED STATES, March 19, 2025 /EINPresswire.com/ -- SW Sustainability Solutions Inc. proudly announces its achievement of an SME B Climate Score in the 2024 Carbon Disclosure Project (CDP) assessment, reinforcing our commitment to environmental transparency and sustainable business practices. As part of a global network of 12,500+ SMEs, this milestone underscores our ongoing efforts to manage climate-related risks, reduce emissions, and drive meaningful environmental action.

Why CDP Disclosure Matters

At SW Sustainability Solutions Inc., we believe that sustainability is not just a responsibility but a core driver of

business resilience and innovation. By participating in CDP's dedicated SME Climate Disclosure Questionnaire, we are taking a proactive approach to:

- Enhancing environmental transparency, ensuring our stakeholders have access to credible climate data.
- Aligning with global sustainability standards, supporting regulatory compliance and investor expectations.
- Identifying opportunities for efficiency and emissions reduction, driving long-term value for our business and community.

The Value of Achieving an SME B Climate Score

Achieving an SME B Climate Score in the CDP assessment is a testament to our leadership in sustainability and environmental responsibility. This recognition:

- Differentiates Us in the Industry: Few manufacturers, especially in our sector, achieve this level of environmental disclosure and performance, positioning SW as a leader in sustainability.

- **Strengthens Business Partnerships:** Many businesses and institutions prioritize working with CDP-recognized companies to align with their own sustainability goals, making SW a preferred partner for eco-conscious organizations.
- **Supports Long-Term Business Growth:** Sustainability-driven strategies lead to cost savings through energy efficiency, waste reduction, and supply chain optimization, reinforcing our operational resilience.

Understanding Our SME B Score

CDP's scoring methodology evaluates companies on their climate risk management, emissions reporting, and sustainability governance. An SME B Climate Score positions

us among the top-performing SMEs in climate action, reflecting our commitment to measuring and managing Scope 1, 2, and 3 emissions. This recognition serves as a foundation for continuous improvement in our sustainability journey.

Among the thousands of SMEs participating in CDP disclosure, achieving a B score is a rare accomplishment that highlights SW Sustainability Solutions Inc. as an industry leader. As a manufacturer, this distinction is even more significant, demonstrating our ability to integrate sustainability into our operations while maintaining high-quality product performance. Our achievement underscores the importance of environmental responsibility within the glove industry and sets a benchmark for our peers.

Commitment to Continuous Improvement

This recognition reinforces our broader sustainability strategy, which includes initiatives in energy efficiency, water stewardship, and sustainable supply chain management. Our participation in CDP strengthens our commitment to transparency and accountability, allowing us to make data-driven decisions that drive positive environmental impact.

At SW Sustainability Solutions Inc., we remain dedicated to fostering a sustainable future, and this CDP achievement marks another step in our journey toward environmental leadership.

About SW Sustainability Solutions

At SW, we are committed to leading the glove industry in environmental, social, and governance (ESG) practices. Our innovative [EcoTek®](#) technology exemplifies our dedication to sustainable solutions, while our expertise in sweat management ensures comfort and performance. We also offer specialized chemical compatibility support, assisting customers in selecting gloves tailored to their unique needs. Our mission is to provide products that prioritize safety, health, and

environmental responsibility for our customers and the planet. Learn more at swssglobal.com.

About CDP

CDP is a global non-profit organization that runs the world's leading environmental disclosure system. Founded in 2000, CDP provides a platform for companies, cities, states, and regions to report on their environmental impact. Over 24,000 companies disclosed through CDP in 2024, sharing data on climate change, forests, and water security. By offering a standardized framework for climate, water, and deforestation-related disclosures, CDP empowers organizations to enhance transparency, drive sustainability action, and align with international climate goals. CDP's data is widely used by investors, policymakers, and businesses to make informed decisions on sustainability and environmental performance. Learn more at www.cdp.net.
