

# A' Biotechnology and Bioengineering Design Award Unveils Comprehensive Prize Package for 2024

*A' Biotechnology and Bioengineering Design Award reveals extensive benefits package aimed at recognizing excellence in biotechnology innovation*

COMO, CO, ITALY, March 21, 2025

[/EINPresswire.com/](https://www.einpresswire.com/) -- The A'

[Biotechnology](#) and Bioengineering [Design Award](#)

has announced its comprehensive prize package for the 2024-2025 competition period. This highly prestigious award program, established in 2008, aims to recognize

and celebrate outstanding achievements in biotechnology and bioengineering design. The competition serves as a platform for biotechnology innovators, research institutions, and enterprises to gain recognition for their contributions to advancing the field of biotechnology design.

The award responds to the growing need for innovation in biotechnology and bioengineering, addressing crucial challenges in healthcare, agriculture, and environmental sustainability. Through its rigorous evaluation process, the award aims to identify and celebrate designs that demonstrate exceptional potential for positive societal impact. The recognition of excellence in biotechnology design plays a vital role in encouraging the development of solutions that can enhance quality of life and advance scientific progress.

The competition welcomes entries from biotechnology [designers](#), bioengineering specialists, research institutions, and biotechnology companies worldwide. Eligible works include innovative biotechnology solutions, bioengineering processes, medical devices, and other groundbreaking developments in the field. The submission deadline for last entries is March 30th, 2025, with results to be announced on May 1st, 2025.

Entries undergo evaluation through a blind peer-review process by an international jury panel comprising industry experts, academics, and professionals. Projects are assessed based on

Biotechnology Innovation Awards 2025

innovation, functionality, technical excellence, and potential societal impact. The evaluation criteria ensure a fair and comprehensive assessment of each submission's merits.

Winners receive the prestigious A' Design Award trophy, winner's certificate, and the right to use the A' Design Award winner logo. The prize package includes professional recognition tools designed to acknowledge excellence in biotechnology innovation. Additional benefits include access to exclusive networking opportunities and participation in design excellence initiatives.

The award program supports the advancement of biotechnology and bioengineering by creating incentives for innovation and excellence. By recognizing outstanding achievements, the competition aims to inspire continued progress in developing solutions that address global challenges and improve human well-being through biotechnology.

#### About A' Biotechnology and Bioengineering Design Award

The A' Biotechnology and Bioengineering Design Award represents a prestigious recognition platform for innovation in biotechnology design. The award provides a competitive arena for biotechnology professionals, research institutions, and companies to showcase their achievements while maintaining confidentiality of their intellectual property. This award category specifically focuses on advancing biotechnology solutions that contribute to societal progress through innovation and excellence in design.

#### About A' Design Award

The A' Design Award and Competition, established in 2008, operates as a comprehensive international design competition system. Based in Como, Italy, the competition aims to promote and reward design excellence across multiple disciplines. Through its ethical and philanthropic mission, the award encourages the creation of products and projects that benefit society. The competition employs a rigorous blind peer-review process, ensuring fair evaluation of entries based on pre-established criteria. Participants from all countries compete annually, contributing to the global advancement of design innovation.
