

'Battle for the Truth - Creation versus Evolution' Challenges Scientific and Biblical Perspectives on Origins

CHANDLER, AZ, UNITED STATES, March 21, 2025 /EINPresswire.com/ -- A groundbreaking book, *Battle for the Truth - Creation versus Evolution* (2nd Edition), by Dr. Heng-Der Chiou, delves into one of the most debated topics in history: the origins of life and the universe. This compelling work presents an in-depth analysis of both scientific discoveries and biblical teachings, questioning whether creation or evolution holds the ultimate truth.

Since Charles Darwin published *The Origin of Species* in 1859, the debate between science and religion has continued to evolve.

Dr. Chiou examines this controversy by considering two dominant theories—the Evolution Theory and the Big Bang Theory. He argues that modern scientific findings align with biblical creation, demonstrating that the universe and all life within it were purposefully designed rather than emerging from random processes.

The book methodically breaks down key scientific advancements, including:

The vastness of the universe and recent evidence supporting its expansion, reinforcing the biblical assertion that "In the beginning God created the heavens and the earth" (Genesis 1:1).

The concept of "intelligent design," which suggests that life's complexity and order indicate the necessity of a Creator.

The limitations of evolutionary theory, particularly in explaining the origins of life and the

structure of DNA.

The intricate and purposeful design of the human body, reinforcing the idea that life is intentional, not accidental.

Dr. Chiou argues that evolution lacks scientific proof for macroevolution and misinterprets microevolutionary adaptations. He presents a strong case that recent scientific discoveries support the view that nature itself points to divine creation.

Dr. Heng-Der Chiou is a retired engineer, scientist, and an elder at the Evangelical Formosan Christian Church in Phoenix. He has authored five books in Chinese and one in English, all exploring the relationship between science and Christianity. Dr. Chiou holds a Ph.D. in Materials Science and Engineering from Northwestern University and has taught at Tatung University. With extensive experience in research and development at companies like Monsanto and Motorola, he holds nine U.S. patents and has published over 30 technical papers. He currently resides in Chandler, Arizona, with his wife, FanMei (Lin).

Battle for the Truth - Creation versus Evolution (2nd Edition) aims to strengthen the faith of Christians while providing thought-provoking insights for those exploring the origins of life. It offers readers a unique opportunity to examine scientific discoveries through the lens of faith, fostering a deeper understanding of the universe and humanity's place within it.

"Scientific discoveries reveal a world of purposeful and orderly creation, aligning with the biblical truth of God's design."

"Evolution lacks the foundation to explain the origins of life, but intelligent design offers a framework that bridges science and faith."

"The complexity of DNA, nature, and the universe all point to an intelligent Creator.

The book is coming soon!
