CarSmarti Highlights Growing Need for
Layered Vehicle Theft Prevention Amid Evolving Criminal Tactics

As vehicle thefts continue to rise nationwide, CarSmarti, a Boca Raton-based vehicle security resource provider, is drawing attention to the growing importance of a layered approach to theft prevention—an approach supported by recommendations from the [National Insurance Crime Bureau \(NICB\)](#) and the [National Highway Traffic Safety Administration \(NHTSA\)](#).

“

Effective vehicle protection doesn't have to be expensive—just smart, visible, and layered to stay ahead of modern theft tactics.”

David Adams

According to NICB reports, over one million vehicles were stolen in the U.S. in 2023 alone, marking an increase in both volume and sophistication of auto theft. Industry experts note that many thieves now exploit online tools and advanced technology to bypass factory-installed anti-theft systems.

This trend has led safety advocates to urge vehicle owners to combine multiple forms of protection, a strategy commonly referred to as layered security. This includes the use of visible deterrents, electronic tracking, physical barriers, and unique identification tools.

“Criminals are increasingly bypassing standard vehicle security features,” said a CarSmarti spokesperson. “A multi-layered approach can reduce vulnerability and increase the odds of recovery.”

To support public education on the topic, CarSmarti is highlighting a range of anti-theft tools

frequently recommended in the industry. These include:

GPS tracking devices for real-time vehicle location

License Plate Reader (LPR) recovery network access to aid in law enforcement-assisted recovery

Paint fingerprint decals to provide unique identification markers

Window deterrent labels, a low-cost yet effective visual deterrent

Steering wheel and seatbelt locks for added physical resistance

Faraday key shield boxes to block fob signals from relay attacks

CarSmarti also recognizes the role of other complementary tools, such as VIN etching, dash cams, and license plate security bolts, whether or not distributed directly through its network.

As part of its continued outreach, CarSmarti is collaborating with distributors to raise awareness around vehicle theft prevention. Local promotions and educational campaigns may be seen in select communities in the coming months.
