

Addison's Disease Market Report 2025: Size, Trends, And Growth Insights For Global Expansion

The Business Research Company's Addison's Disease Market Report 2025: Size, Trends, And Growth Insights For Global Expansion

LONDON, GREATER LONDON, UNITED KINGDOM, March 24, 2025
/EINPresswire.com/ -- Updated 2025
Market Reports Released: Trends, Forecasts to 2034 – Early Purchase Your Competitive Edge Today!

The Addison's disease market has expanded rapidly in recent years. It is expected to grow from \$2.05 billion in 2024 to \$2.25 billion in 2025, registering a CAGR of 10.0%. The growth in the past period was driven by factors such as the rising global incidence of Addison's disease, increased awareness of adrenal insufficiency, higher healthcare expenditure, a growing prevalence of autoimmune diseases, and an aging population.

It will grow to \$3.26 billion in 2029 at a compound annual growth rate (CAGR) of 9.7%”

The Business Research Company

Is the Addison's Disease Market Set to Witness Substantial Growth?

The momentum in the Addison's disease market is projected to continue in the coming years with an estimated growth to \$3.26 billion in 2029 at a compound annual growth rate CAGR of 9.7%. The optimistic forecasts can be attributed to multiple factors such as escalating demand for advanced therapies, increasing emphasis on early diagnosis, surging prevalence of congenital adrenal hyperplasia cases, market growth in telemedicine services, and a rise in the incidence of adrenal tuberculosis.

Crucial advancements in the forecast period include progressive developments in laboratory testing methodologies, state-of-the-art advancements in hormone replacement therapies, innovations in imaging technologies, introduction of long-acting injectable formulations, and the integration of artificial intelligence in diagnostic tools.

What Drives The Addison's Disease Market Growth?

One significant driver enhancing the Addison's disease market's growth trajectory in the future is the escalating prevalence of autoimmune diseases. These disorders, characterized by the immune system mistakenly attacking the body's own healthy tissues, lead to inflammation and damage. Factors such as genetic predispositions, environmental pollutants and dietary changes, along with lifestyle influences like stress and lack of physical activity can contribute to the rising prevalence of autoimmune diseases. With the increasing prevalence of autoimmune diseases, the likelihood of co-occurrence with Addison's disease increases, as many patients tend to develop additional autoimmune conditions.

Who Are The Key Players In The Addison's Disease Market?

Prominent companies operating in the Addison's disease market include Pfizer Inc., Roche Holding AG, Merck & Co. Inc., Bayer AG, Bristol-Myers Squibb Company, Novartis AG, Takeda Pharmaceutical Company Limited, GlaxoSmithKline plc, Amgen Inc., Teva Pharmaceutical Industries Ltd., Boehringer Ingelheim International GmbH, Sandoz, Ipsen S.A., Neurocrine Biosciences Inc., Recipharm AB, Accord Healthcare, Eton Pharmaceuticals, DuoCort Pharma, Diurnal Group plc, and Roxane Laboratories Inc.

Market leaders are increasingly focusing on innovative solutions such as regenerative therapies. These medical approaches aim at replacing or regenerating human cells, tissues, or organs to restore normal function and promote healing in case of disease, injury, or degeneration and can potentially reduce lifelong dependence on hormone replacement therapies by stimulating the body's natural adrenal function.

How Is The Addison's Disease Market Segmented?

The Addison's disease market is segmented by type into Primary Adrenal Insufficiency, Secondary Adrenal Insufficiency, and Tertiary Adrenal Insufficiency. Depending on the drug class, the market can be broadly categorized into Oral Corticosteroid, Hydrocortisone, Fludrocortisone, and Corticosteroid Injections. Segmentation by diagnosis includes Laboratory Testing and Imaging Testing, and by end-users, it is segmented into Hospitals And Clinics, Diagnostic Laboratories, and Other End Users.

In 2024, North America was the largest region in the Addison's disease market, while Asia-Pacific is expected to be the fastest-growing region in the coming years.
