

# Refresh any Workspace with INNOCN's Spring Deals on Ultra-Wide Monitors

SHENZHEN, GUANGDONG, CHINA, March 26, 2025 /EINPresswire.com/ -- INNOCN has launched its Spring Sale, marking the beginning of a new era in high-performance display technology. Running from March 25 to 31, this limited-time event offers significant discounts on a range of ultra-wide monitors designed for gaming, content creation, and professional use. With cutting-edge features and expanded screen real estate, these monitors provide users with an immersive and efficient visual experience at reduced prices.

As display technology continues to evolve, users increasingly seek monitors that offer a balance between immersive visuals, efficiency, and productivity. INNOCN's ultra-wide monitors cater to a variety of needs, from gaming enthusiasts requiring fast refresh rates to professionals needing expansive screen space for multitasking. The 49C1G and [49C1R](#) models are designed with gaming performance in mind. Both feature a 32:9 ultra-wide curved display with an 1800R curvature, creating an immersive viewing experience by extending the field of vision.

The 49C1G, originally priced at \$749.99, is now available for \$599.99, offering a 144Hz refresh rate and WDFHD (3840 x 1080) resolution for smooth and responsive gameplay. The 49C1R, discounted from \$874.99 to \$674.99, features a 120Hz refresh

rate and QHD (5120 x 1440) resolution, striking a balance between speed and high-definition clarity. Both models support 99% sRGB color accuracy, HDR400, and multiple connectivity options, including USB Type-C, DisplayPort, and HDMI. Built-in speakers and an adjustable ergonomic stand further enhance usability for gaming and general entertainment.

For professionals and creative users, the [49Q1R](#) and [49Q1S](#) models provide expanded screen space and high-resolution OLED displays. These monitors offer an alternative to traditional multi-monitor setups, making them suitable for video editing, graphic design, financial analysis, and other demanding workflows. The 49Q1R, featuring a 5K2K OLED display with a 144Hz refresh rate, is now available for \$799.99, a discount of \$250. With its high resolution and color precision, it is an ideal choice for tasks requiring detailed visuals. The 49Q1S, known for its ultra-smooth 240Hz refresh rate, is available for \$949.99, reflecting a \$310 discount. Its high responsiveness makes it a versatile option for professionals who require both accuracy and fluid performance. Both OLED models come with factory-calibrated 99% sRGB color accuracy, split-screen functionality, and ergonomic adjustability, allowing users to customize their workspace for optimal productivity and comfort.

Ultra-wide monitors continue to gain popularity due to their ability to streamline workflows and enhance user experiences. The 32:9 aspect ratio eliminates the need for a dual-monitor setup, reducing clutter and simplifying workspace organization. Whether managing multiple applications, editing high-resolution

content, or engaging in fast-paced gaming, these displays provide a seamless and high-performance solution. For professionals, the expanded screen space allows for improved multitasking, enabling multiple windows and applications to be open simultaneously without compromising visibility. Meanwhile, gamers benefit from the wider field of view, which enhances situational awareness in competitive environments.

INNOCN's Spring Sale is available until March 31, offering a limited-time opportunity for users to upgrade their monitor setup at a reduced price. Customers can find more details on the discounted models through the following product links:
