Chronic Sialorrhea Global Market Report 2025

Is the Chronic Sialorrhea Market Set to Witness Substantial Growth?

“

It will grow to \$0.97 billion in 2029 at a compound annual growth rate (CAGR) of 6.2%.”

*The Business Research  
Company*

The global chronic sialorrhea market has been demonstrating strong growth in recent years. It is expected to grow from \$0.72 billion in 2024 to \$0.76 billion in 2025, registering a compound annual growth rate CAGR of 6.5%. What is driving the growth and how has it increased over the years?

The historic period's growth can be attributed to an

increasing prevalence of neurological disorders, population growth, and growing awareness and diagnosis, coupled with an increased demand for non-invasive treatments. As the market continues to grow robustly, the period forecasted till 2029 anticipates the market size to be \$0.97 billion at a CAGR of 6.2%.

What factors are set to contribute to the rapid market growth expected in the coming years?

The expected growth during the forecast period can be linked to an increasing awareness about

treatment options, burgeoning healthcare spending, escalating pediatric cases, and rising demand for oral gels and liquid. Major trends predicted to define the forecast period include telemedicine for remote monitoring, patient-centered care models, pharmacological innovations, integration of speech and occupational therapies, and development of long-acting pharmaceuticals.

What is the impact of the increased prevalence of neurodegenerative disorders on chronic sialorrhea market?

The prevalence of neurodegenerative disorders characterized by the progressive degeneration or death of nerve cells neurons in the brain and spinal cord is on the rise due to genetic factors, environmental influences, improved understanding of disease mechanisms, chronic health conditions, and societal and psychological factors. Chronic sialorrhea, often a complication of these disorders, particularly Parkinson's disease and ALS, necessitates targeted treatments to prevent aspiration, enhance oral function, and improve patient comfort. As a result, the increasing prevalence of neurodegenerative disorders is driving the growth of the chronic sialorrhea market.
