Roofing Misconceptions and the Truth Everyone Must Know

Stokes Roofing takes the privilege to break down some common misconceptions that surround the roofing industry so that homeowners can avoid costly mistakes.

#Myth 1 - New roof over an existing one

Many people think that replacing a new roof over an existing roof will save time and money. In contrast, it will lead to issues like difficulty inspecting the roof for damages, potential leaks due to uneven surfaces, increased weight strain on the roof structure, compromised structural integrity, and reduced lifespan of the new shingles. Moreover, it brings some complications with the warranties.

#Myth 2: DIY roof repairs can save money.

Without proper training and safety equipment, DIY repairs can lead to further damage down the line. A poorly done repair can lead to safety hazards and more expensive repairs in the long run. It is best left to professionals.

#Myth 3: Roof inspections are only needed when leaks occur.

Regular roof inspections approximately once every 2 years help detect issues early and prevent costly damage. Proactive maintenance can extend the life of your roof significantly.

“Remember, your roof is a significant investment in your home and taking care of it should be a

high priority," warns Stokes Roofing.

Stokes Roofing offers roof repairs, complete re-roofing, roof inspection, fascia replacement, soffit replacement, Eavestrough Replacement and Siding Replacement. If anyone needs expert and reliable roofing services, contact Stokes Roofing at [stokesroofing.net](https://www.stokesroofing.net).
