

EMINENT Services Corporation Expands Support for Food Allergy Research with Cost-Effective Solutions

FREDERICK, MD, UNITED STATES, March 26, 2025 /EINPresswire.com/ --

[EMINENT Services Corporation](#), a global CDMO subsidiary of [EMINENT Life Sciences](#), a recognized leader in clinical trial support, proudly announces its continued commitment to advancing food allergy research. As food allergies reach epidemic proportions in the United States, EMINENT is driving innovation by supporting groundbreaking clinical trials while delivering critical services at a fraction of the cost of traditional providers.

Addressing an Urgent Public Health Crisis : Food allergies affect approximately 33 million Americans—including 11% of adults and 8% of children—and their

prevalence is rising at an alarming rate. Over the past two decades, childhood food allergy rates have surged by 50%, with peanut allergies in children tripling since the late 1990s. Shellfish allergies alone impact 8.4 million people, contributing to 3.4 million annual emergency room visits and severe reactions like anaphylaxis in over 40% of affected children. (Facts and Statistics - FoodAllergy.org)

Beyond the physical toll, food allergies impose emotional and financial burdens on families, often causing anxiety, stress, and social isolation. As researchers explore innovative immunotherapy approaches—including Oral Immunotherapy (OIT), Sublingual Immunotherapy (SLIT), and Epicutaneous Immunotherapy (EPIT)—the need for affordable, high-quality clinical trial support has never been more significant.

As the prevalence of food allergies continues to rise, EMINENT remains steadfast in its commitment to empowering researchers and clinicians to develop safer, more effective therapies. By combining cutting-edge infrastructure, deep expertise, and cost-efficient solutions, EMINENT is helping pave the way for transformative treatments that promise to improve the lives of millions.

EMINENT's Role: Delivering High-Impact Solutions at Lower Costs

EMINENT Services Corporation plays a pivotal role in advancing food allergy research by collaborating with prestigious organizations such as the Division of Allergy, Immunology, and Transplantation (DAIT), the National Institute of Allergy and Infectious Diseases (NIAID), and the National Institutes of Health (NIH). Over the last two decades, EMINENT has consistently and successfully supported a range of Consortium for Food Allergy Research (CoFAR) and Immune Tolerance Network (ITN) clinical trials, focusing on the safety and efficacy of transformative immunotherapy treatments through comprehensive investigational drug management.

EMINENT offers comprehensive services that ensure the success of complex clinical trials. These services include:

- Product Sourcing and Manufacturing
- Rigorous Testing and Quality Control
- Randomization and Blinding
- Precise Labeling and Distribution
- Pharmaceutical and Regulatory Support
- Central Laboratory Services

By streamlining these processes and leveraging strategic partnerships, EMINENT significantly reduces the costs of managing investigational products. Compared to traditional providers, EMINENT's cost-effective model maximizes the return on research investments, allowing resources to be allocated where they are needed most—accelerating the path to life-saving treatments.

Empowering Innovation Through Diagnostics and Public Health Solutions: In addition to its CDMO expertise, EMINENT extends its impact through its subsidiary, [CIAN](#) Diagnostics a state-of-the-art CLIA-certified and CAP-accredited lab that offers high-throughput diagnostics for genetic and infectious diseases, routine chemistry assays, and public health solutions. CIAN's capabilities enable faster, more accurate diagnostic testing, further enhancing the efficiency and quality of clinical research.

EMINENT Services Corporation is a global leader in supporting clinical research, specializing in investigational product management and advancing therapeutic innovations. Partnering with top-tier institutions, EMINENT is committed to addressing critical health challenges such as food allergies with unmatched efficiency, reliability, and affordability.
