

# This Week in Construction: Top Innovations & Industry Trends – March 26, 2025

*Peer-to-peer digital content sharing for construction and building professionals*

SUNDRE, ALBERTA, CANADA, March 26, 2025 /EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

This week's featured video highlights the Robocraft project, a visionary collaboration between the University of Calgary's School of Architecture, Planning and Landscape (SAPL) and the City of Calgary. Robocraft explores how robotic fabrication can reshape urban development - enhancing accessibility, reducing environmental impact, and creating local jobs. Central to this three-year initiative is a 450-kilogram robotic arm housed at the Wave Technology Centre, which enables researchers to prototype advanced construction techniques using sustainable materials and digital tools. Led by Dr. Alicia Nahmad Vazquez, Robocraft empowers communities to help design and 3D-print public infrastructure - from ramps to paving stones that can be tailored to local needs. Supported by the Urban Alliance, Prairies Economic Development Canada, and Mitacs, the project is not only transforming how we build but also fostering workforce

development in robotics and digital manufacturing.

Featured content published this week includes a range of topical subjects:

- [ConTech Weekly: Innovation in Construction – No. 100](#)
- Turner Construction Launches Turner Ventures to Drive Innovation in Construction
