Paraganglioma Global Market Report 2025 - Market Size, Trends, And Global Forecast 2025-2034

The panuveitis market size has grown rapidly in recent years. It will expand from \$4.05 billion in 2024 to \$4.47 billion in 2025 at a compound annual growth rate CAGR of 10.5%. Such robust growth in the historic period can be traced back to factors such as the rising prevalence of autoimmune and infectious diseases, an increasing use of corticosteroids, growing adoption of biologics, increasing demand for ophthalmic imaging, and burgeoning research investment in infectious causes.

It will grow to \$3.64 billion in 2029 at a compound annual growth rate (CAGR) of 4.7%.

Is the Panuveitis Market Set to Witness Substantial Growth?

Looking forward, the panuveitis market size is slated for rapid growth in the near future. It is estimated to accelerate to \$6.58 billion in 2029 at a compound annual

growth rate CAGR of 10.2%. Projected growth in the forecast period is attributable to factors including expanding use of biologic therapies, rising demand for personalized medicine, increasing prevalence of uveitis-linked diseases, escalated investments in ophthalmic research, and growing disease awareness.

What Drives The Panuveitis Market Growth?

The rise in autoimmune disorders is expected to fuel the growth of the panuveitis market going

forward. Autoimmune diseases, arising when the immune system mistakenly targets and damages the body's healthy cells and tissues, have seen a consequential uptick due largely to genetic predispositions, pollution, dietary changes, and increased exposure to certain infections and stressors that may trigger immune system dysregulation. Consequently, autoimmune disorders are driving panuveitis treatment advancements through research into immune system modulation.
