

Global Schizoaffective Disorder Market Outlook 2025-2034: Growth Drivers, Share, And Trends

The Business Research Company's Schizoaffective Disorder Global Market Report 2025 – Market Size, Trends, And Global Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, March 27, 2025
/EINPresswire.com/ -- The

[schizoaffective disorder global market report](#)

reveals a strong growth trend in the schizoaffective disorder market size. From \$7.36 billion in 2024, the market is expected to grow to \$7.77 billion in 2025, reflecting a compound annual growth rate CAGR of 5.5%. This growth can be attributed to an increase in awareness of mental health disorders, improved diagnostic criteria, elevated healthcare funding, access to mental health services, and a rise in both prevalence and treatment of mental health conditions.

Is the Schizoaffective Disorder Market Set to Witness Substantial Growth?

In the next few years, the schizoaffective disorder market size is expected to see remarkable growth, reaching \$9.47 billion by 2029 at a CAGR of 5.1%. The growth projected

within the forecast period can be traced back to increasing prevalence of mental health conditions, a rise in investment for psychiatric drug development, public awareness for mental illnesses, the development of healthcare infrastructure, especially in emerging markets, as well as a surge in personalized medicine approaches.

Emerging market trends include the development of atypical antipsychotics, the adoption of personalized medicine approaches, advancements in digital health platforms, innovation in long-acting injectable medications, improved diagnostic tools, the integration of AI in therapy management, as well as enhanced psychotherapeutic techniques.

What Drives The Schizoaffective Disorder Market Growth?

The rise in neurological disorders is expected to fuel the growth of the schizoaffective disorder market going forward. Neurological disorders are medical conditions that impact the nervous system, including the brain, spinal cord, and nerves, leading to various cognitive, motor, and sensory dysfunctions. The prevalence of these neurological disorders contributes to the detection and occurrence of schizoaffective disorder through shared biological mechanisms, improved diagnostic capabilities, and growing awareness.

Notably, in April 2023, the National Library of Medicine reported around 6.7 million Americans are affected by Alzheimer's in 2023, a number which is projected to grow to 13.8 million by 2060.
