Definition:

Man-made Sausage Casing or sausage skin or casing is used to enclose the filling of a sausage. It is available in two types, natural and artificial. Natural sausage casings are made from the sub-mucosa of the small intestine, a layer of the intestine that consists mainly of naturally occurring collagen whereas Artificial sausage casing is prepared from collagen (often derived from cattle skin), cellulose, or plastic. Further, with the increasing urban population and hectic work life and rising urban population, the demand for man-made sausage casing is expected to rise from the household consumption thereby driving the man-made sausage casing market.

Market Drivers:

- Growth in demand for plant-based sausage casings, Innovations in biodegradable & edible casings, Expansion in halal & kosher markets

Market Trends:

- Rising global meat consumption, Growth in convenience & processed foods, Increased adoption of automated sausage production

Challenges:

- Competition from natural casings, Price volatility of raw materials, Environmental concerns over plastic-based casings
