

Alpha Vision showcases AI-Powered Construction Site Safety at ISC West 2025

Alpha Vision to showcase AI Inspector, Magic Search, and Virtual Guard at Booth #5076, highlighting game-changing safety and surveillance innovations.

SUNNYVALE, CA, UNITED STATES, March 31, 2025 /EINPresswire.com/ -- [Alpha Vision](#), a leading provider of AI-powered security and monitoring solutions, today announced it will showcase its full suite of intelligent surveillance products at ISC West 2025 in Las Vegas (booth #5076). The company's comprehensive lineup – [AI Inspector](#), [Magic Search](#), and Virtual Guard – is set to demonstrate how artificial intelligence can transform construction site safety, property security, and real-time incident response.

Alpha Vision | Construction Job Site Monitoring | ISC West 2025

Alpha Vision's integrated solutions enable businesses to proactively protect their sites and assets with cutting-edge technology. From detecting if workers are missing personal protective equipment (PPE) to issuing automated danger zone alerts, the AI Inspector offers autonomous patrols using AI-driven pan-tilt-zoom cameras to monitor large areas without pause. Meanwhile, Virtual Guard provides 24/7 site surveillance with AI-powered voice warnings that deter intruders in real time, helping prevent unauthorized access before incidents occur. Rounding out the suite, Magic Search delivers instant, AI-powered video search that lets security teams locate critical footage in seconds through natural language queries, eliminating hours of manual review.

“

We're excited to bring our full AI security suite to ISC West 2025 to show how intelligent technology can make security both smarter and simpler...”

Yi Jin, Ph.D., Head of Marketing at Alpha Vision

Key Features and Benefits:

Real-Time Safety Alerts: Automatically detects safety compliance issues like missing hard hats or

vests, improving PPE compliance by up to 74% and immediately warning personnel of danger zone breaches.

Autonomous AI Patrols: Leverages intelligent PTZ cameras and “virtual guard” analytics to spot trespassers, hazards, or anomalies across construction sites and facilities, reducing reliance on manual patrols and potentially saving up to \$110,000 in annual security costs.

Instant Video Retrieval: Magic Search allows users to swiftly find specific events or people across countless hours of video using simple descriptions, turning days of footage review into seconds and enabling faster investigations and response.

Proactive Deterrence: Built-in AI voice announcements and alarm triggers actively ward off intruders or alert staff to safety violations, preventing incidents before they escalate and minimizing downtime.

“We’re excited to bring our full AI security suite to ISC West 2025 to show how intelligent technology can make security both smarter and simpler,” said Yi Jin, Ph.D., Head of Marketing at Alpha Vision. “From construction sites to corporate campuses, AI Inspector, Magic Search, and Virtual Guard work together to save lives, save time, and save money. We’ve seen these solutions boost PPE compliance dramatically and reduce incident-related costs for our early adopters. Our vision is to empower organizations to move from reactive surveillance to truly proactive protection.”

Attendees at ISC West 2025 (March 31–April 4, Venetian Expo, Las Vegas) are invited to visit Alpha Vision at Booth #5076 for hands-on demonstrations of all three solutions. Company experts will be on site to show how AI Inspector conducts autonomous patrols, how Magic Search retrieves critical video evidence on the fly, and how Virtual Guard keeps watch around the clock with automated alerts and deterrents.
