The Surrogacy Process – Step by Step

Surrogacy at Surrogacy4All is designed to be as smooth and stress-free as possible. The process includes:

1. Application & Pre-Screening

Potential surrogates complete an initial application and screening process to determine eligibility. This includes medical and psychological evaluations, background checks, and interviews.

2. Matching with Intended Parents

Once approved, surrogates are carefully matched with intended parents based on personal preferences, compatibility, and expectations. Surrogates have the opportunity to get to know the intended parents before moving forward.

3. Medical Screening & Legal Process

After matching, surrogates undergo a detailed medical examination at a fertility clinic. A legal contract is also created to ensure clear expectations and protection for both parties. Surrogates receive legal guidance throughout the process.

4. Embryo Transfer & Pregnancy

A fertilized embryo from the intended parents (or donors) is implanted in the surrogate's uterus using in vitro fertilization (IVF). Once pregnancy is confirmed, surrogates receive comprehensive medical care and ongoing support.

5. Delivery & Compensation Completion

Surrogates deliver the baby in a hospital setting, where the intended parents are present to welcome their child. After delivery, surrogates receive final compensation and continued postpartum support.
