In the fast-paced digital landscape, businesses require the

ability to settle payments instantly to maintain seamless operations and dependable liquidity. An Instant Payments capability ensures funds are cleared and settled within seconds, at any time of day or night. This constant access to funds empowers businesses to make prompt payments to employees and vendors, fostering stronger relationships while reducing costs.

With enhanced liquidity across the payment ecosystem, businesses save on interest and fees. These savings free up capital for other uses, enabling vendors to expedite their own bill payments and improve overall financial stability. The combined result is a more robust economy

with stronger business relationships, satisfied employees, and greater peace of mind for all stakeholders.

#### Key Features of Instant Payments (RTP®/FedNOW®)

- Swift Settlement: Transactions settle within seconds, around the clock, every day of the year.
- Enhanced Cash Flow: Immediate fund availability improves both financial stability and accessibility.
