

New LabTAG Add-On Streamlines Laboratory Labeling with Dymo® LabelWriter™ 5-Series and eLabNext Integration

BOSTON, MA, UNITED STATES, April 3, 2025 /EINPresswire.com/ -- GA International, a global leader in laboratory identification solutions, under its [LabTAG](#) brand, announced today that its DYMO® LabelWriter™ 5-Series Printing Kits are now compatible with [eLabNext](#)'s Digital Lab Platform (DLP) — an intuitive and flexible system for collecting, managing, and analyzing laboratory information. The integration is available in the eLabMarketplace through an Add-on, and provides researchers with a reliable, precise, and user-friendly solution for labeling in critical laboratory workflows.

“We’re excited to expand our partnership with eLabNext by introducing this Dymo® LabelWriter™ 550 Add-On,” comments George Ambartsoumian, Founder and CEO of GA International. “This tool allows researchers to print labels directly from the eLabNext interface, making sample identification faster, easier, and more reliable. It’s another step forward in our shared mission to streamline lab workflows and improve sample and data management in laboratories.”

The Add-on allows users access to pre-designed label templates tailored for LabTAG’s specialized DYMO-Branded CryoSTUCK® Labels directly within the eLabNext DLP. These templates are optimized for the Dymo® LabelWriter™ 5-series printers, ensuring perfect formatting, dimensions, and layout alignment. This eliminates the need for manual adjustments and enables effortless label printing in just a few clicks. By combining the affordability of the Dymo® LabelWriter™ 5-Series (550, 550 Turbo, and 5XL) with LabTAG’s durable cryogenic labels, the Add-on also offers a cost-effective labeling solution, particularly beneficial for labs working on a tight budget.

“We jump on every opportunity to enhance our platform by integrating tools that simplify workflows, collaborating with companies that share our passion for sample and data

management, and streamlining lab operations for our users,” says Zareh Zurabyan, VP of Commercial, Americas. “This recent collaboration with LabTAG is a win for everyone and ensures that labs can focus on their research with confidence, knowing their labeling needs are met with innovative and reliable technology.”

To learn more about eLabNext’s DLP and how to connect with LabTAG’s Dymo® LabelWriter™ 550 Printer Add-on, visit the eLabMarketplace.

About eLabNext

eLabNext is a Digital Lab Platform (DLP) that offers an intuitive and flexible solution to collect, manage, and analyze laboratory information. The software includes modules for an Electronic Lab Notebook (ELN), Laboratory Information Management System (LIMS), sample tracking, inventory management, protocol management, and a wide range of marketplace Add-ons to extend functionality. eLabNext enhances productivity by streamlining the processes of documenting, organizing, searching, and archiving data, samples, and protocols. The data is accessible through cloud-hosted ISO-certified data centers. The software is most suitable for industry R&D labs, ranging from start-ups to mid-size pharma and biotech companies and academic research groups and institutes. In January of 2025, eLabNext announced it has merged with SciShield, a leading digital EHS solution provider, to create [SciSure](#), a visionary new platform that integrates health and safety, laboratory operations, and research into a centralized Scientific Management Platform (SMP).
