# Evident Partners with ABS to Streamline Dental Workflows, No Migration Needed

VANCOUVER, BRITISH COLUMBIA, CANADA, April 8, 2025 /EINPresswire.com/ -- Digital dentistry solutions provider Evident has announced a new partnership with lab management software Atlanta Based Systems (ABS).

This collaboration enables dental labs to integrate EviSmart's automation capabilities into their existing ABS workflows, eliminating the need for software migration.

Evident Partners with ABS to Streamline Dental Workflows, No Migration Needed

Evident launched EviSmart, a first-of-its-kind, Ai-powered dental workflow solution, earlier this year. Its automation features include automated case data entry, intelligent case tracking, and real-time notifications with lab partners.

Improved Case Intake Without System Disruption

"As labs handle increasing case volume, they can be slowed down by manual data entry and errors," said Paolo Kalaw, CEO of Evident. "We believe solving these problems should not require labs to overhaul their entire systems."

Providing lab management software for over 40 years, ABS is a trusted partner for dental labs in the US, Canada, and Australia. Its integration with EviSmart aims to enhance ABS workflows through streamlining case intake, reducing time-intensive tasks, and minimizing risk for human error.

A Future of Interoperability

The collaboration between EviSmart and ABS is part of Evident's initiative to drive interoperability across the dental industry. By supporting seamless integrations with various lab management software platforms, EviSmart continues to expand access to advanced automation tools for

dental labs worldwide.

About Evident and EviSmart

Evident is committed to advancing digital dentistry by providing Ai-driven solutions that address the key challenges faced by dental labs, dentists, and manufacturers. The EviSmart platform, which includes EviSmart Nest, EviSmart Downloader, and other cutting-edge tools, is designed to streamline operations, improve accuracy, and enhance collaboration across the dental ecosystem. By optimizing workflows for dental labs and improving the flow of data between labs, dentists, and manufacturers, EviSmart helps deliver top-quality results efficiently and effectively.
