

Luxafor Launches Zoom Integration for LED Busy Lights

Luxafor announces full Zoom Workspace status integration for its LED availability lights, including the Flag, Busy Tag, and Bluetooth Pro.

NEW YORK, NY, UNITED STATES, April 9, 2025 /EINPresswire.com/ -- Luxafor, a developer of productivity-enhancing LED status indicators and workspace management tools, has announced the release of Zoom Workspace status integration for its range of LED availability devices, now supporting both Windows and macOS platforms.

Zoom status display on all Luxafor busy lights

This new functionality enables Luxafor busy lights, such as the Luxafor Flag, Busy Tag, and Bluetooth Pro, to automatically reflect a user's real-time Zoom status.

“

This Zoom integration was built from user feedback to help professionals stay focused, adding powerful new functionality to our devices at no extra cost.”

Kaspars Škerba

Whether a user sets their Zoom status to “In a Meeting,” “Away,” or “Do Not Disturb,” the connected Luxafor device updates accordingly using clear LED signals.

By reflecting real-time Zoom statuses through visual LED signals, Luxafor devices help teams work more efficiently, respect each other's focus time, and minimize unnecessary

interruptions.

The Luxafor Flag offers real-time [Zoom status display](#) with an [LED busy light](#) for individuals in open offices, helping prevent interruptions by clearly signaling when someone is unavailable. For shared spaces and meeting rooms, the [wireless busy light](#) Luxafor Bluetooth Pro shows Zoom status remotely, helping teams avoid interruptions and signal when a room is in use.

Luxafor's integration with Zoom adds to its growing suite of smart features, which already

includes support for Microsoft Teams, Zapier, email alerts, productivity timers and other productivity tools.

By integrating with Zoom Workspace statuses, Luxafor takes another step toward enabling smarter, more respectful collaboration. Whether in an office or remote setting, the integration gives teams a simple, visible way to understand availability without the need for messaging or verbal check-ins.

Setup instructions for both Windows and macOS users are available now at luxafor.com.
