

Abacus Semiconductor announces venture capitalist and angel investor Vivek Mehra to its Strategic Advisory Board

PACIFICA, CA, UNITED STATES, April 10, 2025 /EINPresswire.com/ -- Abacus Semiconductor, a leader in High Performance Computing, announced today that IT technology-focused Venture Capitalist Vivek Mehra has joined the company's Strategic Advisory Board. He will be advising Abacus Semiconductor on Go-to-

Market strategy as well as fundraising efforts. Vivek is also currently a partner emeritus at August Capital after joining in 2003. Prior to August Capital, Vivek co-founded Cobalt Networks. As Cobalt's CTO and VP of Product Development, Vivek built the first successful data server appliance and then grew Cobalt into the worldwide leader in this category. This led to Cobalt's successful IPO and then acquisition by Sun Microsystems for \$2B.

Dr. Axel Kloth, Founder and CEO of Abacus Semiconductor adds, "We are proud to have secured Vivek to our Strategic Advisory Board. He is an accomplished technologist who then brought the same rigor to the VC world and managed to excel in that field as well. His insight into the customer base and the investment community will help shape our approach to the Go-To-Market and fundraising efforts."

About Abacus Semiconductor Corporation

Abacus Semiconductor is a fabless semiconductor company and a leading developer of RISC-V based processors, accelerators and smart multi-homed memories for the computational backbone for Artificial Intelligence. This patented, revolutionary computing architecture is poised to solve the scalability challenges facing the booming AI infrastructure market.
