

# Bingus Reflects on Conscious Cannabis Growing in The Sovereignty of Cannabis

HILLSBORO, OR, UNITED STATES, April 9, 2025 /EINPresswire.com/ -- The world of cannabis cultivation is often seen through a practical lens—focused on growth cycles, yields, and environmental control. Yet, a deeper, more spiritual connection exists between the plant and the cultivator, a relationship explored in the thought-provoking work *The Sovereignty of Cannabis* by Bingus. This book invites readers to go beyond the surface and embrace a profound understanding of the plant's life force and the broader implications of its cultivation and use.

Bingus's book positions cannabis as a sentient being in its own right whose interaction with its environment is far more complex than merely responding to external stimuli. The plant's growth is framed as a conversation that takes place through subtle cues and silent exchanges between the grower and the greenery.

One of the book's primary themes is the concept of "listening" to cannabis. As Bingus explains, cannabis is not merely a commodity to be harvested and consumed—it is a living entity that communicates through its leaves, stems, and the energy it emits. A skilled cultivator recognizes the plant's subtle shifts in behavior, understanding that these changes reflect the cannabis's needs, desires, and health when growers treat their plants with care and attention, cannabis flourishes, not just in physical form but in its vibrancy and vitality.

The book also addresses the importance of conscious cultivation practices. While traditional growing methods emphasize control, Bingus advocates for a more harmonious approach rooted in patience, awareness, and empathy. By creating an environment of respect, cultivators can foster not just the growth of cannabis but a deeper connection to the natural world. *The Sovereignty of Cannabis* calls upon readers to rethink the way they approach the plant, suggesting that cannabis cultivation should be an act of partnership rather than domination.

In addition to its reflections on cultivation, the book delves into the cultural, social, and environmental impacts of cannabis. Bingus addresses the history of cannabis cultivation, its legal battles, and the modern shift in its societal perception, advocating for a more mindful approach to both the plant and its place in society. With the increasing legalization of cannabis across various regions, the book underscores the importance of approaching the plant with reverence and responsibility, recognizing the broader implications for communities, ecosystems, and the planet.

The Sovereignty of Cannabis ultimately suggests that cultivating cannabis is a holistic experience that requires more than just technical knowledge—it requires a deep, introspective understanding of one’s environment and relationship with the world around them. This book explores how cultivating cannabis with intention and awareness can lead to a richer, more meaningful connection with nature.

#### About the Author

Bingus is a spiritual herbalist, cannabis advocate, and horticulturist with a profound passion for nature. With years of experience cultivating cannabis, he explores its spiritual and medicinal properties, emphasizing its role in healing and transformation.

As a writer, Bingus delves into plant spirituality, cannabis culture, and the interconnectedness of all living beings. His work reflects a deep belief in the wisdom of the green soul and its ability to awaken humanity's connection to nature. Bingus seeks to inspire a more conscious and respectful relationship with the natural world through his writing and advocacy.

The Sovereignty of Cannabis: The Green Soul by BINGUS is now available on his official website and Amazon.
